CONTENTS.

SERIES B. VOL. CVII.

No. 748—September 3, 1930.

	PAGE
The Relationship of Climatic and Geological Factors to the Composition of Soil Clay and the Distribution of Soil Types. By E. M. Crowther. Communicated by Sir John Russell, F.R.S.....	1
The Relation between the Anterior Pituitary Body and the Gonads. Part I.—The Factors concerned in the Formation of the Corpus Luteum. By M. Hill and A. S. Parkes. Communicated by C. L. Evans, F.R.S. (Plate 1.).....	30
The Relation between the Anterior Pituitary Body and the Gonads. Part II.—The Induction of Ovulation in the Ancestrous Ferret. By M. Hill and A. S. Parkes. Communicated by C. L. Evans, F.R.S. (Plates 2-4.)	39
A Cytological Demonstration of "Genetic" Crossing-Over. By C. D. Darlington. Communicated by Sir Daniel Hall, F.R.S. (Plate 5.)	50
The Development and Vascularisation of the Corpus Luteum in the Mouse and Rabbit. By R. Deanesly. Communicated by J. P. Hill, F.R.S. (Plates 6-8.)...	60
The Distillation of Vitamin D. By F. A. Askew, R. B. Bourdillon, H. M. Bruce, R. G. C. Jenkins and T. A. Webster. Communicated by H. H. Dale, Sec. R.S.	76
The Effects of Further Irradiation of the Radiation Products of Ergosterol. By F. A. Askew, R. B. Bourdillon, H. M. Bruce, R. G. C. Jenkins and T. A. Webster. Communicated by H. H. Dale, Sec. R.S.	91
The Vital Staining of Normal and Malignant Cells. III.—Vital Staining of Acinar Cells of the Pancreas, and its Bearing on the Theories of Vital Staining with Basic Dyes. By R. J. Ludford. Communicated by J. A. Murray, F.R.S. (Plate 9.).....	101

No. 749.—October 1, 1930.

The Heat Production in Isometric and Isotonic Twitches. By A. V. Hill, F.R.S....	115
Observations on the Living Eggs of the Rabbit. By G. Pincus. Communicated by F. H. A. Marshall, F.R.S. (Plates 10-13.)	132
Cell Structure and Cell Activity. By M. Penrose and J. H. Quastel. Communicated by Sir Frederick Hopkins, F.R.S.	168

	PAGE
The Frozen State in Mammalian Muscle. By T. Moran. Communicated by Sir William Hardy, F.R.S.....	182
The Functions of the Corpus Luteum.—IV. The Relation of Œstrin to the Luteal Phase of the Œstrous Cycle. By A. S. Parkes. Communicated by C. L. Evans, F.R.S. (Plates 14–16.)	188

No. 750.—November 3, 1930.

Cellular Individuality in the Higher Animals, with Special Reference to the Individuality of the Red Blood Corpuscle.—II. By C. Todd, F.R.S.	197
A Method for the Estimation of Iron in Biological Material. By R. Hill. Communicated by Sir Frederick Hopkins, F.R.S.	205
The Heat of Rigor of Mammalian Muscle. By E. C. Smith. Communicated by Sir William Hardy, F.R.S.....	214
Observations on Certain Physiological Processes of the Marmot. I.—The Heart. By G. Endres, B. H. C. Matthews, H. Taylor and A. Dale. Communicated by J. Barcroft, F.R.S. (Plates 17 and 18.)	222
Observations on Certain Physiological Processes of the Marmot. II.—The Respiration. By G. Endres and H. Taylor. Communicated by J. Barcroft, F.R.S. ...	231
Observations on Certain Physiological Processes of the Marmot.—III, IV and V. By G. Endres. Communicated by J. Barcroft, F.R.S.	241
The Accumulation of Electrolytes in Plant Cells—A Suggested Mechanism. By G. E. Briggs. Communicated by F. F. Blackman, F.R.S.	248
The Scattering of Light in Protein Solutions. I.—Gelatin Solutions and Gels. By K. Krishnamurti. (Abstract.) Communicated by F. G. Donnan, F.R.S.....	269

No. 751.—December 2, 1930.

Prothrombase—Its Preparation and Properties. By J. Mellanby, F.R.S.....	271
The Porphyrin of Component c of Cytochrome and its Relationship to other Porphyrins. By R. Hill and D. Keilin, F.R.S.	286
The Differential Action of X-Rays on Tissue, Growth and Vitality. Part II.—The Biological Reaction to X-Radiation in Relation to a Phenomenon termed Antagonism. By W. Moppett. Communicated by J. T. Wilson, F.R.S.	293
The Differential Action of X-Rays on Tissue, Growth and Vitality. Part III.—The Biological Reaction to X-Radiation in Relation to the Area of Tissue Irradiated. By W. Moppett. Communicated by J. T. Wilson, F.R.S. (Plate 19.)	302
The Differential Action of X-Rays on Tissue, Growth and Vitality. Part IV.—The Biological Reaction to X-Radiation in Relation to Time. By W. Moppett. Communicated by J. T. Wilson, F.R.S.	308

	PAGE
The Mechanism of Ciliary Movement.—VI. Photographic and Stroboscopic Analysis of Ciliary Movement. By J. Gray, F.R.S. (Plates 20–22.).....	313
The Contraction of the Extrinsic Muscles of the Eye by Choline and Nicotine. By W. S. Duke-Elder and P. M. Duke-Elder. Communicated by C. L. Evans, F.R.S.	332
Secondary Electronic Emissions from Metal Foils and Animal Tissues. (Extract and Summary.) By W. V. Mayneord. Communicated by H. Hartridge, F.R.S.	344

No. 752.—January 1, 1931.

Address of the President, Sir Ernest Rutherford, O.M., at the Anniversary Meeting, December 1, 1930	348
The Isolation by Cataphoresis of Two Different Oxyhaemoglobins from the Blood of some Animals. By A. Geiger. Communicated by H. H. Dale, Sec. R.S.	368
The Origin of the Mesoderm in the Gastropod <i>Viviparus</i> (= <i>Paludina</i>). By W. Fernando. Communicated by E. W. MacBride, F.R.S. (Plates 23–28.).....	381
The Origin and Development of the Pericardium and Kidneys in <i>Ostrea</i> . By W. Fernando. Communicated by E. W. MacBride, F.R.S. (Plates 29–32.)	391
Croonian Lecture.—The Theories of the Bacteriophage. By J. Bordet, For. Mem. R.S.	398

No. 753.—February 3, 1931.

Studies on Echinoderm Oogenesis.—I. <i>Antedon bifida</i> (Pennant). By L. A. Harvey. Communicated by J. H. Ashworth, F.R.S.	417
Studies on Echinoderm Oogenesis.—II. <i>Asterias rubens</i> , Linné. By L. A. Harvey. Communicated by J. H. Ashworth, F.R.S.	441
The Relation between the Anterior Pituitary Body and the Gonads. Part III.—Fractionation and Dilution of Ovary-Stimulating Extracts. By M. Hill and A. S. Parkes. Communicated by C. L. Evans, F.R.S. (Plates 33 and 34.).....	455
The Pupillary Mechanism of the Teleostean Fish <i>Uranoscopus scaber</i> . By J. Z. Young. Communicated by E. S. Goodrich, F.R.S.	464
Metabolic Changes associated with Pigmentary Effector Activity and Pituitary Removal in <i>Xenopus laevis</i> .—I. Respiratory Exchange. By E. Charles. Communicated by H. H. Dale, Sec. R.S.	486
Metabolic Changes associated with Pigmentary Effector Activity and Pituitary Removal in <i>Xenopus laevis</i> .—II. Calcium and Magnesium Content of the Serum. By E. Charles. Communicated by H. H. Dale, Sec. R.S.	504

No. 754.—March 7, 1931.

	PAGE
Studies on the Flexor Reflex.—I. Latent Period. By J. C. Eccles and Sir Charles Sherrington, F.R.S. (Plates 35 and 36.)	511
Studies on the Flexor Reflex.—II. The Reflex Response Evoked by Two Centripetal Volleys. By J. C. Eccles and Sir Charles Sherrington, F.R.S. (Plates 37 and 38.)	535
Studies on the Flexor Reflex.—III. The Central Effects Produced by an Antidromic Volley. By J. C. Eccles. Communicated by Sir Charles Sherrington, F.R.S. (Plates 39 and 40.)	557
Studies on the Flexor Reflex.—IV. After-Discharge. By J. C. Eccles and Sir Charles Sherrington, F.R.S. (Plates 41 and 42.)	586
Studies on the Flexor Reflex.—V. General Conclusions. By J. C. Eccles and Sir Charles Sherrington, F.R.S.	597
The Osmotic Changes in Some Marine Animals. By R. Margaria. Communicated by A. V. Hill, F.R.S.	606

 OBITUARY NOTICES.

Gadow, Hans Friedrich	i
Balfour, The Earl of	iv
