

INDEX TO VOL. CVII. (B)

- Anterior pituitary body (Hill and Parkes), 455.
- Anterior pituitary body and gonads (Parkes), 30, 39.
- Askew (F. A.), Bourdillon (R. B.), Bruce (H. M.), Jenkins (R. G. C.) and Webster (T. A.)
The Distillation of Vitamin D, 76 ; The Effects of Further Irradiation of the Radiation
Products of Ergosterol, 91.
- Bacteriophage, theories (Bordet), 398.
- Balfour (Earl of), obituary, iv.
- Bordet (J.) The Theories of the Bacteriophage, 398.
- Bourdillon (R. B.) See Askew and others.
- Briggs (G. E.) The Accumulation of Electrolytes in Plant Cells, 248.
- Bruce (H. M.) See Askew and others.
- Cell structure and activity (Penrose and Quastel), 168.
- Cellular individuality in the higher animals (Todd), 197.
- Charles (E.) Metabolic Changes associated with Pigmentary Effector Activity and Pituitary
Removal in *Xenopus laevis*, I, II, 486, 504.
- Ciliary movement, mechanism (Gray), 313.
- Component c of cytochrome (Hill and Keilin), 286.
- Corpus luteum, functions (Parkes), IV, 188.
- Corpus luteum of the mouse and rabbit (Deanesly), 60.
- Croonian Lecture. See Bordet.
- Crowther (E. M.) The Relationship of Climatic and Geological Factors to the Composition
of Soil Clay and the Distribution of Soil Types, 1.
- Dale (A.) See Endres and others.
- Darlington (C. D.) A Cytological Demonstration of "Genetic" Crossing-Over, 50.
- Dawkins (Sir William Boyd), obituary, xxiii.
- Deanesly (R.) The Development and Vascularisation of the Corpus Luteum in the Mouse
and Rabbit, 60.
- Duke-Elder (P. M.) See Duke-Elder and Duke-Elder.
- Duke-Elder (W. S.) and Duke-Elder (P. M.) The Contraction of the Extrinsic Muscles of
the Eye by Choline and Nicotine, 332.
- Eccles (J.) Studies on the Flexor Reflex, III, 557.
- Eccles (J.) and Sherrington (Sir Charles) Studies on the Flexor Reflex, I, II, IV, V, 511,
535, 586, 597.
- Echinoderm oogenesis (Harvey), 417.
- Electrolytes in plant cells (Briggs), 248.
- Endres (G.), Matthews (B. H. C.), Taylor (H.) and Dale (A.) Observations on Certain
Physiological Processes of the Marmot, I.-V., 222, 231, 241.
- Ergosterol, radiation products (Askew and others), 91.
- Evans (J. W.), obituary, xxvii.
- Extrinsic muscles of the eye, contraction (Duke-Elder and Duke-Elder), 332.

- Fernando (W.) The Origin of the Mesoderm in the Gastropod *Viviparus*, 381 ; The Origin and Development of the Pericardium and Kidneys in *Ostrea*, 391.
- Flexor reflex, studies (Eccles), III, 557.
- Flexor reflex, studies (Eccles and Sherrington), I, II, IV, V, 511, 535, 586, 597.
- Gadow (H. F.), obituary, i.
- Geiger (A.) The Isolation by Cataphoresis of two different Oxyhaemoglobins from the Blood of some Animals, 368.
- "Genetic" crossing-over (Darlington), 50.
- Gray (J.) The Mechanism of Ciliary Movement, VI, 313.
- Harvey (L. A.) Studies on Echinoderm Oogenesis, I, II, 417, 441.
- Heat of rigor of mammalian muscle (Smith), 214.
- Heat production in isometric and isotonic twitches (Hill), 115.
- Hill (A. V.) The Heat Production in Isometric and Isotonic Twitches, 115.
- Hill (R.) A Method for the Estimation of Iron in Biological Material, 205.
- Hill (R.) and Keilin (D.) The Porphyrin of Component c of Cytochrome and its Relationship to other Porphyrins, 286.
- Hill (M.) and Parkes (A. S.) The Relation between the Anterior Pituitary Body and the Gonads, I, II, III, 30, 39, 455.
- Iron, estimation in biological material (Hill), 205.
- Jenkins (R. G. C.) See Askew and others.
- Keilin (D.) See Hill and Keilin.
- Krishnamurti (K.) The Scattering of Light in Protein Solutions (Abstract), 269.
- Ludford (R. J.) The Vital Staining of Normal and Malignant Cells, III, 101.
- Margaria (R.) The Osmotic Changes in Some Marine Animals, 606.
- Marmot, physiological processes (Endres and others), 222, 231, 241.
- Matthews (B. H. C.) See Endres and others.
- Mayneord (W. V.) Secondary Electronic Emissions from Metal Foils and Animal Tissues (Abstract), 344.
- Mellanby (J.) Prothrombase—Its Preparation and Properties, 271.
- Mesoderm, origin in *Viviparus* (Fernando), 381.
- Metabolic changes in *Xenopus laevis* (Charles), 486, 504.
- Moppett (W.) The Differential Action of X-Rays on Tissue, Growth and Vitality, II, III, IV, 293, 302, 308.
- Moran (T.) The Frozen State in Mammalian Muscle, 182.
- Muscle, mammalian, frozen state (Moran), 182.
- Obituary notices :—
- | | |
|-----------------------------------|----------------------|
| Balfour, Earl of, iv. | Evans, J. W., xxvii. |
| Dawkins, Sir William Boyd, xxiii. | Gadow, H. F., i. |
- Oogenesis, echinoderm (Harvey), 417.
- Osmotic changes in marine animals (Margaria), 606.

- Ostræa*, origin and development of pericardium and kidneys (Fernando), 391.
 Oxyhæmoglobins, isolation by cataphoresis (Geiger), 368.
- Parkes (A. S.) See also Hill and Parkes.
- Parkes (A. S.) The Functions of the Corpus Luteum, IV, 188.
- Penrose (M.) and Quastel (J. H.) Cell Structure and Cell Activity, 168.
- Pericardium, origin and development (Fernando), 381.
- Pincus (G.) Observations on the Living Eggs of the Rabbit, 132.
- Plant cells, accumulation of electrolytes (Briggs), 248.
- Porphyrin of Component c of Cytochrome (Hill and Keilin), 286.
- Presidential Address, 348.
- Prothrombase, preparation and properties (Mellanby), 271.
- Pupillary mechanism of teleostean fish (Young), 464.
- Quastel (J. H.) See Penrose and Quastel.
- Rabbit, living eggs (Pincus), 132.
- Red blood corpuscle, individuality (Todd), 197.
- Rigor of mammalian muscle (Smith), 214.
- Rutherford (Sir Ernest) Address at Anniversary Meeting, 348.
- Sherrington (Sir Charles) See Eccles and Sherrington.
- Smith (E. C.) The Heat of Rigor of Mammalian Muscle, 214.
- Soil clay, relationship of climatic and geological factors (Crowther), I.
- Soil types, distribution (Crowther), I.
- Staining of normal and malignant cells (Ludford), 101.
- Taylor (H.) See Endres and others.
- Todd (C.) Cellular Individuality in the Higher Animals, with special reference to the Individuality of the Red Blood Corpuscle, II, 197.
- Twitches, isometric and isotonic (Hill), 115.
- Uranoscopus scaber*, pupillary mechanism (Young), 464.
- Vital staining of normal and malignant cells (Ludford), 101.
- Vitamin D, distillation (Askew and others), 76.
- Viviparus*, origin of mesoderm (Fernando), 381.
- Webster (T. A.) See Askew and others.
- X-Rays, differential action on tissue, growth and vitality (Moppett), 293, 302, 308.
- Young (J. Z.) The Pupillary Mechanism of the Teleostean Fish, *Uranoscopus scaber*, 464.
