

INDEX TO VOLUME CXXIII (B)

- Aerobic respiration in barley seedlings and its relation to growth (Barnell), 321.
Alimentary secretions of intact animals, effect of posterior pituitary extract on (Cutting, Dodds, Noble and Williams), 27.
Ashby (E.) Heterosis and the inheritance of quantitative characters, 431.
Atkins (W. R. G.) *See* Poole and Atkins.
- Bachmann (W. E.), Cook (J. W.), Dansi (A.), de Worms (C. G. M.), Haslewood (G. A. D.), Hewett (C. L.) and Robinson (Mrs. A. M.) The production of cancer by pure hydrocarbons, IV, 343.
Bacteria, action of radiations on (Lea, Haines and Coulson), 1.
Barnell (H. R.) Analytic studies in plant respiration: VII—Aerobic respiration in barley seedlings and its relation to growth and carbohydrate supply, 321.
Bawden (F. C.) and Pirie (N. W.) The isolation and some properties of liquid crystalline substances from solanaceous plants infected with three strains of tobacco mosaic virus, 274.
Bear (R. S.), Schmitt (F. O.) and Young (J. Z.) Investigations on the protein constituents of nerve axoplasm, 520.
Bear (R. S.), Schmitt (F. O.) and Young (J. Z.) The sheath components of the giant nerve fibres of the squid, 496.
Bear (R. S.), Schmitt (F. O.) and Young (J. Z.) The ultrastructure of nerve axoplasm, 505.
Bell (Julia) and Haldane (J. B. S.) The linkage between the genes for colour-blindness and haemophilia in man, 119.
Bhimacher (B. S.) A study of the medulla oblongata of Cyprinodont fishes with special reference to their feeding habits, 59.
Biological material, quantitative spectrographic analysis of (Foster and Horton), 422.
Bose (S. R.) and Sarkar (S. N.) Enzymes of some wood-rotting *Polypores*, 193.
Brooks (J.) The action of nitrite on haemoglobin in the absence of oxygen, 368.
Burrows (H.), Mayneord (W. V.) and Roberts (J. E.) Neoplasia following the application of X-rays to inflammatory lesions, 213.
- Cancer, production of by pure hydrocarbons (Bachmann and others), 343.
Clark (W. E. Le Gros) The connexions of the arcuate nucleus of the thalamus, 166.
Colour-blindness and haemophilia in man, linkage between the genes of (Bell and Haldane), 119.
Cook (J. W.) *See* Bachmann and others.
Coulson (C. A.) *See* Lea, Haines and Coulson.
Crawford (B. H.) The change of visual sensitivity with time, 69.
Cutting (W. C.), Dodds (E. C.), Noble (R. L.) and Williams (P. C.) Pituitary control of alimentary blood flow and secretion, 27, 39, 49.
- Dansi (A.) *See* Bachmann and others.
de Worms (C. G. M.) *See* Bachmann and others.

- Discussion on the transmission of excitation in living material (Pantin), 397.
- Dodds (E. C.), Noble (R. L.), Scarff (R. W.) and Williams (P. C.) Pituitary control of alimentary blood flow and secretion. Changes in the stomach produced by the administration of posterior pituitary extract, 22.
- Dodds (E. C.) *See* Cutting, Dodds, Noble and Williams.
- Ear, human, response of to audio-frequency electrical stimulation (Hallpike and Hartridge), 177.
- Equation, differential, graphical solution of in relation to nerve excitation (Rushton), 382.
- Excitation in living material, discussion on transmission of (Pantin), 397.
- Fishes, mechanism of the lateral sense organs of (Sand), 472.
- Foster (J. S.) and Horton (C. A.) Quantitative spectrographic analysis of biological material II, 422.
- Gamma-rays, action of on growing and on non-proliferating bacteria (Lea, Haines and Coulson), 1.
- Gastric secretion and blood flow in hypophysectomized animals (Cutting, Dodds, Noble and Williams), 49.
- Gastric secretion, effect of alterations in blood flow on (Cutting, Dodds, Noble and Williams), 39.
- Haemoglobin, action of nitrite on in the absence of oxygen (Brooks), 368.
- Haines (R. B.) *See* Lea, Haines and Coulson.
- Haldane (J. B. S.) *See* Bell and Haldane.
- Hallpike (C. S.) and Hartridge (H.) On the response of the human ear to audio-frequency electrical stimulation, 177.
- Hartridge (H.) *See* Hallpike and Hartridge.
- Haslewood (G. A. D.) *See* Bachmann and others.
- Heterosis and the inheritance of quantitative characters (Ashby), 431.
- Hewett (C. L.) *See* Bachmann and others.
- Horton (C. A.) *See* Foster and Horton.
- Lea (D. E.), Haines (R. B.) and Coulson (C. A.) The action of radiations on bacteria. III— γ -rays on growing and on non-proliferating bacteria, 1.
- Leaves, nitrogenous constituents in starving (Yemm), 243.
- Light of various wave-lengths, penetration into sea of (Poole and Atkins), 151.
- Mayneord (W. V.) *See* Burrows, Mayneord and Roberts.
- Medulla oblongata of Cyprinodont fishes, study of (Bhimacher), 59.
- Menstrual cycle of the primates, X, XI (Zuckermann), 441, 457.
- Metabolism, instantaneous measurement of muscle (Millikan), 218.
- Millikan (G. A.) Experiments on muscle haemoglobin *in vivo*; the instantaneous measurement of muscle metabolism, 218.
- Monochromatic rays entering the eye pupil at different points, luminous efficiency of (Stiles), 90.
- Muscle haemoglobin *in vivo*, experiments on (Millikan), 218.

- Neoplasia following the application of X-rays to inflammatory lesions (Burrows, Mayneord and Roberts), 213.
- Nerve axoplasm, protein constituents of (Bear, Schmitt and Young), 520.
- Nerve axoplasm, ultrastructure of (Bear, Schmitt and Young), 505.
- Noble (R. L.) *See* Dodds, Noble, Scarff and Williams; and Cutting, Dodds, Noble and Williams.
- Oestrogenic hormone, part played by in menstrual cycle (Zuckermann), 457.
- Oestrone-threshold of the uterus of the Rhesus monkey (Zuckermann), 441.
- Pantin (C. F. A.) Discussion on the transmission of excitation in living material, 397.
- Pirie (N. W.) *See* Bawden and Pirie.
- Pituitary control of alimentary blood flow and secretion (Dodds, Noble, Scarff and Williams; and Cutting, Dodds, Noble and Williams), 22, 27, 39, 49.
- Polypores*, wood-rotting, enzymes of (Bose and Sarkar), 193.
- Poole (H. H.) and Atkins (W. R. G.) The penetration into the sea of light of various wave-lengths as measured by emission or rectifier photo-electric cells, 151.
- Protein catabolism in starving leaves, (Yemm), 243.
- Protein constituents of nerve axoplasm (Bear, Schmitt and Young), 520.
- Respiration of barley plants, III (Yemm), 243.
- Respiration, plant, VII, Analytic studies (Barnell), 321.
- Roberts (J. E.) *See* Burrows, Mayneord and Roberts.
- Robinson (Mrs A. M.) *See* Bachmann and others.
- Rushton (W. A. H.) A graphical solution of a differential equation with application to Hill's treatment of nerve excitation, 382.
- Sand (A.) The mechanism of the lateral sense organs of fishes, 472.
- Sarkar (S. N.) *See* Bose and Sarkar.
- Scarff (R. W.) *See* Dodds, Noble, Scarff and Williams.
- Schmitt (F. O.) *See* Bear, Schmitt and Young.
- Solanaceous plants infected with tobacco mosaic virus, liquid crystalline substances from (Bawden and Pirie), 274.
- Squid, sheath components of the giant nerve fibres of (Bear, Schmitt and Young), 496.
- Stiles (W. S.) The luminous efficiency of monochromatic rays entering the eye pupil at different points and a new colour effect, 90.
- Stomach, changes in, produced by the administration of posterior pituitary extract (Dodds, Noble, Scarff and Williams), 22.
- Thalamus, connexions of the arcuate nucleus of (Clark), 166.
- Virus, tobacco mosaic (Bawden and Pirie), 27.
- Visual sensitivity, change of with time (Crawford), 69.
- Williams (P. C.) *See* Dodds, Noble, Scarff and Williams; and Cutting, Dodds, Noble and Williams.

Yemm (E. W.) The respiration of barley plants: III—Protein catabolism in starving leaves, 243.

Young (J. Z.) *See* Bear, Schmitt and Young.

Zuckermann (S.) The menstrual cycle of the primates: X—The oestrone-threshold of the uterus of the Rhesus monkey. XI—The part played by oestrogenic hormone in the menstrual cycle, 441, 457.

END OF THE ONE HUNDRED AND TWENTY-THIRD VOLUME (SERIES B)
