WALTER LEWIS, M.A.
AT THE CAMBRIDGE UNIVERSITY PRESS

CONTENTS

SERIES B VOLUME 131

No. B 862. 14 September 1942

	PAGE
The starling (<i>Sturnus vulgaris</i> L.) and foot-and-mouth disease. By W. S. Bullough	1
The physiology of incompatibility in plants. I. The effect of temperature. By D. Lewis. (Plate 1)	13
Some experiments on the trichromatic theory of vision. By H. V. Walters	27
The selection of invisible mutations. By K. Mather and L. G. Wigan	50
The integument and moult cycle of <i>Tegenaria atrica</i> (Araneae). By H. C. Browning	65
The development of the bristles in normal and some mutant types of <i>Drosophila melanogaster</i> . By A. D. Lees and C. H. Waddington	87

No. B 863. 10 December 1942

Croonian Lecture. Chromatic behaviour. By L. Hogben, F.R.S.	111
Bakerian Lecture. Amino-acid analysis and the structure of proteins. By A. C. Chibnall, F.R.S.	136
Evolution in plants by kaleidoscopic mutation. By J. C. Willis, F.R.S.	161
The production of cancer by pure hydrocarbons. VI. By G. M. Badger, J. W. Cook, F.R.S., C. L. Hewett, E. L. Kennaway, F.R.S., N. M. Kennaway and R. H. Martin	170
Blood sedimentation: a study in haemo-mechanics. By R. B. Whittington	183

No. B 864. 14 May 1943

Anniversary Meeting of the Royal Society and Newton Tercentenary Celebrations. (7 Plates)	191
Ferrier Lecture. Fatigue following highly skilled work. By F. C. Bartlett, F.R.S.	247
The effects of cold and colchicine on mitosis in the newt. By H. N. Barber and H. G. Callan. (Plates 9-11)	258
The visceral nervous system of the earthworm: I. Nerves controlling the tone of the alimentary canal. By N. Millott	271

No. B 865. 2 November 1943

	PAGE
Pilgrim Trust Lecture. Organization of American scientists for the war. By K. T. Compton	297
The fate of haemoglobin in <i>Rhodnius prolixus</i> (Hemiptera) and other blood- sucking arthropods. By V. B. Wigglesworth, F.R.S.	313
The spectral sensitivity of the fovea and extrafovea in the Purkinje range. By H. V. Walters and W. D. Wright	340
The visceral nervous system of the earthworm. II. Evidence of chemical trans- mission and the action of sympatheticomimetic and parasympheticomimetic drugs on the tone of the alimentary canal. By N. Millott	362
The origin of the primitive tetrapod limb. By T. S. Westoll	373
The hyomandibular of <i>Eusthenopteron</i> and the tetrapod middle ear. By T. S. Westoll	393
Index	415
