INDEX TO VOLUME 135 (B)

Adjustments in bacterial reaction systems. I. The reducing power of Bact. lactis aerogenes under various conditions (Lewis & Hinshelwood), 301.
Adjustments in bacterial reaction systems. II. Adaptive mechanisms (Hinshelwood & Lewis), 316.
Anniversary Address (Robinson), v.
Antidiuretic hormone and the factors which determine its release. Croonian Lecture (Verney), 25.
Antiplasmodial action and chemical constitution. IX. Carbinolamines derived from 6:7-dimethylquinoline (King & Wright), 271.

Bacterial reaction systems I (Lewis & Hinshelwood), 301.
Bacterial reaction systems II (Hinshelwood & Lewis), 316.
Bawden, F. C. See Brown, Brooks & Bawden.
Brooks, F. T. See Brown, Brooks & Bawden.
Brown, W., Brooks, F. T. & Bawden, F. C. A discussion on the physiology of resistance to disease in plants, 171.
Bullough, W. S. Mitotic activity in the adult male mouse, Mus musculus L. The diurnal cycles and their relation to waking, and sleeping, 212.
Bullough, W. S. The effects of experimentally induced rest and exercise on the epidermal mitotic activity of the adult male mouse Mus musculus L., 233.
Buoyancy of plankton diatoms: a problem of cell physiology (Gross & Zeuthen), 382.

Changes induced in Bact. lactis aerogenes by irradiation with ultra-violet light (Peacocke & Hinshelwood), 454.
Cook, A. H., Elvidge, J. A. & Heilbron, Sir Ian. Fertilization, including chemotactic phenomena in the Fucaeae, 293.
Croonian Lecture (1946). The formal genetics of man (Haldane), 147.
Croonian Lecture (1947). The antidiuretic hormone and the factors which determine its release (Verney), 25.
Croonian Lecture (1948). The insect as a medium for the study of physiology (Wigglesworth), 430.
Curtis, P. J. See Brian, Curtis & Hemming.

Daphnia, haemoglobin (Fox), 195.
Diffusion and muscle processes (Hill), 446.
Discussion on the physiology of resistance to disease in plants (Brown, Brooks & Bawden), 171.
Drury, A. N. The Lister Institute of Preventive Medicine, 405.

Earthworm, histophysiology of alimentary canal (Millott), 358.
Effects of experimentally induced rest and exercise on the epidermal mitotic activity of the adult male mouse, Mus musculus L. (Bullough), 233.
Electrical properties of the muscle fibre membrane (Katz), 506.
Elvidge, J. A. See Cook, Elvidge & Heilbron.

Fertilization, including chemotactic phenomena in the Fucaeae (Cook, Elvidge & Heilbron), 293.
Formal genetics of man. Croonian Lecture (Haldane), 147.

[ 535 ]
Fox, H. M. The haemoglobin of *Daphnia*, 195.
Fucaceae, Fertilization (Cook, Elvidge & Heilbron), 293.

General Electric Company, Research Laboratories (Paterson), 1.
Genetic and antigenic basis of tumour transplantation. Linkage between a histocompatibility gene and 'fused' in mice (Gorer, Lyman & Snell), 499.
Genetics of man, Croonian Lecture (Haldane), 147.
Glutinosin: a fungistatic metabolic product of the mould *Metarrhizium glutinosum* S. Pope (Brian, Curtis & Hemming), 106.
Gold, T. Hearing. II. The physical basis of the action of the cochlea, 492.
Gold, T. & Pumphrey, R. J. Hearing. I. The cochlea as a frequency analyzer, 462.

Haemoglobin of *Daphnia* (Fox), 195.
Haldane, J. B. S. Croonian Lecture. The formal genetics of man, 147.
Hearing. I. The cochlea as a frequency analyzer (Gold & Pumphrey), 462.
II. The physical basis of the action of the cochlea (Gold), 492.
Heilbron, Sir Ian. See Cook, Elvidge & Heilbron.
Hemming, H. G. See Brian, Curtis & Hemming.
Hemmings, W. A. See Brambell, Hemmings & Rowlands.
Hill, A. V. On the time required for diffusion and its relation to processes in muscle, 446.
Hinshelwood, C. N. & Lewis, P. R. Adjustments in bacterial reaction systems. II. Adaptive mechanisms, 316.
Hinshelwood, C. N. See Lewis & Hinshelwood and Peacocke & Hinshelwood.
Histophysiolog of the alimentary canal of the earthworm *Lumbricus terrestris* Linnaeus.
I. The process of extrusion from the intestinal glands, and other features of the intestinal epithelium (Millott), 358.

Insect as a medium for the study of physiology. Croonian Lecture. (Wigglesworth), 430.

Katz, B. The electrical properties of the muscle fibre membrane, 506.
Kew, Royal Botanic Gardens (Salisbury), 419.
King, H. & Wright, Jean. Antiplasmodial action and chemical constitution. IX. Carbinol-amines derived from 6:7-dimethylquinoline, 271.
Kodak Research Laboratories (Mees), 133.

Lewis, P. R. & Hinshelwood, C. N. Adjustments in bacterial reaction systems. I. The reducing power of *Bact. lactis aerogenes* under various conditions, 301.
Lewis, P. R. See Hinshelwood & Lewis.
Lister Institute of Preventive Medicine (Drury), 405.
Lyman, S. See Gorer, Lyman & Snell.

Marine Biological Association, Plymouth Laboratory (Russell), 12.
Mees, C. E. K. The Kodak Research Laboratories, 133.
Millott, N. The histophysiolog of the alimentary canal of the earthworm *Lumbricus terrestris* Linnaeus. I. The process of extrusion from the intestinal glands, and other features of the intestinal epithelium, 358.
Mitotic activity in the adult male mouse, *Mus musculus* L. The diurnal cycles and their relation to waking and sleeping (Bullough), 212.
Muscle fibre, electrical properties (Katz), 506.
Myelin sheaths of nerve fibres (Sanders), 323.

Passage of antibodies from the maternal circulation into the embryo in rabbits (Brambell, Hemmings & Rowlands), 390.
Peacocke, A. R. & Hinshelwood, C. N. The changes induced in Bact. lactis aerogenes by irradiation with ultra-violet light, 454.
Plankton diatoms, buoyancy (Gross & Zeuthen), 382.
Plymouth Laboratory of the Marine Biological Association of the United Kingdom (Russell), 12.
Pumphrey, R. J. See Gold & Pumphrey.

Quantitative investigation of the vertebrate brain and the applicability of allometric formulae to its study (Sholl), 243.

Resistance to disease in plants (Discussion) (Brown, Brooks & Bawden), 171.
Rowlands, W. T. See Brambell, Hemmings & Rowlands.
Royal Botanic Gardens, Kew (Salisbury), 419.
Russell, F. S. The Plymouth laboratory of the Marine Biological Association of the United Kingdom, 12.

Sanders, F. K. The thickness of the myelin sheaths of normal and regenerating peripheral nerve fibres, 323.
Sholl, D. The quantitative investigation of the vertebrate brain and the applicability of allometric formulae to its study, 243.
Snell, G. D. See Gorer, Lyman & Snell.

Thickness of the myelin sheaths of normal and regenerating peripheral nerve fibres (Sanders), 323.
Time required for diffusion and its relation to processes in muscle (Hill), 446.
Tumour transplantation, basis (Gorer, Lyman & Snell), 499.

Verney, E. B. Croonian Lecture. The antidiuretic hormone and the factors which determine its release, 25.
Vertebrate brain, quantitative investigation and application of allometric formulae (Sholl), 243.

Wellcome Research Institution (Kellaway), 259.
Wigglesworth, V. B. Croonian Lecture. The insect as a medium for the study of physiology, 430.
Wright, Jean. See King & Wright.

Zeuthen, E. See Gross & Zeuthen.
