

## A DISCUSSION ON GENE ACTION AND ITS CONTROL

ORGANIZED BY G. D. H. BELL, F.R.S., R. RILEY, F.R.S. AND  
J. M. THODAY, F.R.S.

(Discussion held 19 and 20 February 1970—MSS received 27 May 1970)

[Plates 22 to 32]

### CONTENTS

	PAGE
J. M. THODAY, F.R.S. Introductory remarks	249
F. GROS, P. KOURILSKY, D. LUZZATI AND S. NAONO Gene action and its control in micro-organisms	251
D. J. COVE Control of gene action in <i>Aspergillus nidulans</i>	267
J. PAUL, R. S. GILMOUR, H. THOMOY, G. THRELFALL AND D. KOHL Organ-specific gene masking in mammalian chromosomes	277
A. KORNER Hormonal control of protein synthesis	287
H. WILDERMUTH Determination and transdetermination in imaginal disks of <i>Drosophila</i> (summary only)	291
J. R. S. FINCHAM, F.R.S. The regulation of gene mutation in plants	295
J. B. GURDON Nuclear transplantation and the control of gene activity in animal development	303
HENRY HARRIS, F.R.S. The use of cell fusion in the analysis of gene action (summary only)	315
M. ASHBURNER The genetic analysis of puffing in polytene chromosomes of <i>Drosophila</i>	319
C. BAGLIONI Genetic control of immunoglobulin synthesis	329
T. M. SONNEBORN, FOR. MEM. R.S. Gene action in development	347
