A DISCUSSION ON BIOLOGICAL EFFECTS OF POLLUTION IN THE SEA

ORGANIZED BY H. A. COLE

(Discussion held 28 and 29 April 1970—MSS received 8 September 1970)

CONTENTS

H. A. COLE
Objectives of biological pollution studies 277

I. MEASUREMENTS OF POLLUTION EFFECTS ON LIVING ORGANISMS
C. M. TARZWELL
Bioassays to determine allowable waste concentrations in the aquatic environment 279

I. PRESTT
Techniques for assessment of pollution effects on seabirds 287

ELSE M. BURROWS
Assessment of pollution effects by the use of algae 295

II. SUBLETHAL EFFECTS AND CHANGES IN ECOSYSTEMS
J. M. ANDERSON
Assessment of the effects of pollutants on physiology and behaviour 307

P. A. BUTLER
Influence of pesticides on marine ecosystems 321

A. J. O’SULLIVAN
Ecological effects of sewage discharge in the marine environment 331

P. R. O. BARNETT
Some changes in intertidal sand communities due to thermal pollution 353

III. EFFECTS OF PARTICULAR POLLUTANTS
H. ACKEFORS
Mercury pollution in Sweden with special reference to conditions in the water habitat 365

G. W. BRYAN
The effects of heavy metals (other than mercury) on marine and estuarine organisms 389

R. G. J. SHELTON
Effects of oil and oil dispersants on the marine environment 411

D. S. WOODHEAD
The biological effects of radioactive waste 423

Vol. 177. B. (13 April 1971)
IV. PREVENTION AND MONITORING

E. L. Cronin
   Pollution prevention .................................................. 439

A. Preston and P. C. Wood
   Monitoring the marine environment .............................. 451

R. W. Edwards
   Future research needs ............................................... 463
