GENERAL NOTES ON THE PREPARATION
OF SCIENTIFIC PAPERS

Second Edition October 1965 £0.25 (U.S. $0.65)

The purpose of these general notes is firstly to assist authors in the writing of scientific papers in an acceptable style and secondly to suggest the introduction of greater uniformity in the general approach to the preparation of scientific papers for publication. It is, nevertheless, clear that specialized subjects may call for particular methods of presentation, and these notes should be read in conjunction with any instructions issued by the journal in which the author hopes to publish.

This revised and extended edition has been prepared with the assistance of editors of scientific journals attending Conferences of Editors organized by the Royal Society.

SUBSCRIPTIONS TO THE ‘PROCEEDINGS’

Subscriptions may be placed with the Royal Society, payable in advance of publication of the four parts comprising the volume, at the following rates:

Volume in parts as issued £6.25 (post free); in the U.S.A. $16.00
Cloth bound volume £7.00 (post free); in the U.S.A. $18.00
CONTENTS

HUXLEY, A. F.

ASHBY, SIR ERIC

DENTON, E. J. & LAND, M. F.
Mechanism of reflexion in silvery layers of fish and cephalopods. [Plates 3 and 4]  43–61

BURNS, B. DELISLE & WEBB, A. C.
The effects of stationary retinal patterns upon the behaviour of neurons in the cat's visual cortex  63–78

LEWIS, D. & Rao, A. N.
Evolution of dimorphism and population polymorphism in Pemphis acidula Forst  79–94

MURRAY, J. D.
On the molecular mechanism of facilitated oxygen diffusion by haemoglobin and myoglobin  95–110

LEWIS, D. H. & SMITH, D. C.
The autotrophic nutrition of symbiotic marine coelenterates with special reference to hermatypic corals. I. Movement of photosynthetic products between the symbionts  111–129
