A Discussion on Organic Pollutants in the Sea:
Their Origin, Distribution, Degradation and Ultimate Fate
NOTICE TO CONTRIBUTORS TO
PROCEEDINGS AND PHILOSOPHICAL TRANSACTIONS
OF THE ROYAL SOCIETY

The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The 'Instructions to authors' are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper; any diagrams should be drawn in a size to permit blockmaking at a reduction to about one half linear, the lettering being inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper should normally be through a Fellow or Foreign Member of the Society, but papers may be submitted direct to the Executive Secretary. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. In the event of any difficulty, an author is invited to send the paper direct to the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

A DISCUSSION ON ORGANIC POLLUTANTS IN THE SEA: THEIR ORIGIN, DISTRIBUTION, DEGRADATION AND ULTIMATE FATE

Organized by H. A. Cole and J. E. Smith, F.R.S.

(Discussion held 4–5 July 1974 – MSS received 18 September 1974)

CONTENTS

E. D. Goldberg
Synthetic organohalides in the sea
Discussion: W. R. P. Bourne, E. A. Boucher, A. Preston

J. E. Portmann
The bioaccumulation and effects of organochlorine pesticides in marine animals
Discussion: W. R. P. Bourne

C. R. Pearson and G. McConnell
Chlorinated C₁ and C₂ hydrocarbons in the marine environment
Discussion: R. B. Cain

S. Jensen, R. Lange, G. Berge, K. H. Palmork and L. Renberg
On the chemistry of EDC-tar and its biological significance in the sea

N. S. Thom and A. R. Agg
The breakdown of synthetic organic compounds in biological processes
Discussion: A. L. Downing

A. J. van Bennekom, W. W. C. Gieskes and S. B. Tijssen
Eutrophication of Dutch coastal waters

D. E. Hughes and P. McKenzie
The microbial degradation of oil in the sea
Discussion: C. F. Gibbs

E. D. S. Corner
The fate of fossil fuel hydrocarbons in marine animals
Discussion: W. R. P. Bourne, R. B. Cain

G. Eglington, B. R. T. Simoneit and J. A. Zoro
The recognition of organic pollutants in aquatic sediments

P. S. Elías
The medical significance of marine pollution by organic chemicals

K. W. Wilson
The laboratory estimation of the biological effects of organic pollutants

H. A. Cole
Summing up, and consideration of future research needs
