INTERACTIONS BETWEEN VIRUS AND HOST MOLECULES

A DISCUSSION ORGANIZED BY
M. G. P. STOKER, FOR.SEC.R.S., L. V. CRAWFORD
AND S. BRENNER, F.R.S.

PUBLISHED BY THE ROYAL SOCIETY
6 CARLTON HOUSE TERRACE LONDON SW1Y 5AG
The Royal Society welcomes suitable communications for publication in its scientific journals: papers estimated to occupy up to 24 printed pages are considered for the Proceedings and longer papers and those with numerous or large illustrations for the Philosophical Transactions.

Detailed advice on the preparation of papers to be submitted to the Society is given in a leaflet available from the Executive Secretary, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG. The ‘Instructions to authors’ are also printed in every fifth volume of the Proceedings A and B (volume numbers ending in 0 or 5). The basic requirements are: a paper should be as concise as its scientific content allows and grammatically correct; standard nomenclature, units and symbols should be used; the text (including the abstract, the list of references and figure descriptions) should be in double spaced typing on one side of the paper; a leaflet giving detailed advice on the preparation of illustrations is available from the Executive Secretary; diagrams should be expertly drawn at about twice the proposed final size, preferably with lettering in the correct style but if this is not possible the lettering should be inserted not on the original drawings but on a set of copies; where photographs are essential the layout should be designed to give the most effective presentation.

The initial submission of a paper must be through a Fellow or Foreign Member of the Society, but subsequent correspondence will be conducted direct with the author. The latest lists of Fellows and Foreign Members are to be found in the current edition of the Year Book of the Royal Society. A copy of ‘Notes for the guidance of Fellows communicating papers’ is available from the Executive Secretary. In the event of any difficulty, an author is invited to seek the assistance of the Executive Secretary.

No page charge is levied, and the first 50 offprints of a paper are supplied to the author gratis.

The Editors particularly welcome short communications to Proceedings; as far as possible they will be given expeditious treatment both in consideration and in printing, and this will be facilitated if a paper is submitted with a firm recommendation by a Fellow.

It is the policy of the Royal Society not to charge any royalty for the production of a single copy of any one article made for private study or research. Requests for the copying or reprinting of any article for any other purpose should be sent to the Royal Society.
INTERACTIONS BETWEEN VIRUS AND HOST MOLECULES

A DISCUSSION ORGANIZED BY M. G. P. STOKER, FOR.SEC.R.S.,
L. V. CRAWFORD AND S. BRENNER, F.R.S.

(Discussion held 27 and 28 February 1980 – Typescripts received 1 April 1980)

[One plate]

CONTENTS

L. V. CRAWFORD
Introduction: virus–host interactions

T. BLUMENTHAL
Interaction of host-coded and virus-coded polypeptides in RNA phage replication

Discussion: J. R. Menninger

S. EISENBERG
The role of gene A protein and E. coli rep protein in the replication of φX 174
replicative form DNA

Discussion: J. H. SUBAK-SHARPE

M. VAN MONTAGU, M. HØLSTERS, P. ZAMBRYSKI, J. P. HERNALSTEENS,
A. DEPICKER, M. DE BEUCKELEER, G. ENGLET, M. LEMMERS, L. WILLMITZER
AND J. SCHELL
The interaction of Agrobacterium Ti-plasmid DNA and plant cells

Discussion: J. H. SUBAK-SHARPE

G. J. TODARO, R. CALLAHAN, U. R. RAPP AND J. E. DE LARCO
Genetic transmission of retroviral genes and cellular oncogenes

R. L. ERIKSON, M. S. COLLETT, E. ERIKSON AND A. F. PURCHIO
Towards a molecular description of cell transformation by avian sarcoma virus

M. J. HAYMAN, G. RAMSAY, GAY KITCHENER, T. GRAF, H. BEUG, MARTINE
ROUSSEL, S. SAULE AND DOMINIQUE STHENELIN
Cell transformation by avian leukaemia viruses

Discussion: J. H. SUBAK-SHARPE

N. M. WILKIE, R. P. EGLIN, P. G. SANDERS AND J. B. CLEMENTS
The association of herpes simplex virus with squamous carcinoma of the cervix,
and studies of the virus thymidine kinase gene

J. SAMBROOK, M. BOTCHAN, S.-L. HU, T. MITCHISON AND J. STRINGER
Integration of viral DNA sequences in cells transformed by adenovirus 2 or
SV40

P. W. J. RICHY, W. CHIA, CHRISTINE E. CLAYTON AND M. LOVETT
The structure and expression of the integrated viral DNA in mouse cells trans-
formed by simian virus 40

D. P. LANE AND L. V. CRAWFORD
The complex between simian virus 40 T antigen and a specific host protein

BEVERLY E. GRIFFIN, S. M. DILWORTH, Y. ITO AND ULRIKE NOVAK
Polyoma virus: some considerations on its transforming genes
