

General Notes on the Preparation of Scientific Papers

Revised Edition August 1974

General notes on the preparation of scientific papers is a guide for authors, enabling them to present their papers in the most acceptable way from the outset, so reducing work and speeding the rate of publication.

The third edition has been carefully compiled with assistance from the editors of various scientific journals: the *Notes* thus become more authoritative as a guide to current practice and as an aid to established authors as well as to those who are writing their first papers.

32 pages 210 × 150mm illustrated

per 20 copies	£4.95	£5.10
per 50 copies	£10.15	£10.40

QUANTITIES, UNITS, AND SYMBOLS

Second edition 1975

This handbook contains in a convenient form a very great deal of information on SI (the International System of Units), symbols for physical quantities, recommended forms for many aspects of scientific writing including mathematical presentation, labelling of graphs and tables, preferred placements and type fonts for subscripts and superscripts, favoured abbreviations, etc. It also includes recommended values of physical constants. While SI and other internationally recommended practices are emphasized, values of conversion factors are given for use with imperial units and other units outside SI. References to original international authority are quoted.

Its compact size makes *Quantities, Units, and Symbols* an invaluable aid for scientific writing for all authors who wish to follow modern practice especially in physics and chemistry. Equally it should be an immediately available guide for teachers in higher education many of whom will wish their students to own a copy. It is also invaluable for the reader who has found some unfamiliar notation or terminology, not least when he has strayed from his own narrow specialism.

CONTENTS

MARR, D. & ULLMAN, S.	<i>pages</i> 151-180
Directional selectivity and its use in early visual processing. [Plate 1]	
COLQUHOUN, D. & SHERIDAN, R. E.	181-203
The modes of action of gallamine	
COLQUHOUN, D. & HAWKES, A. G.	205-235
On the stochastic properties of single ion channels	
ROUND, F. E. & CRAWFORD, R. M.	237-260
The lines of evolution of the Bacillariophyta. I. Origin. [Plates 1-10]	
MARCHIAFAVA, P. L. & WAGNER, H. G.	261-267
Interactions leading to colour opponency in ganglion cells of the turtle retina
