### NOTICE TO AUTHORS

**Scope.** *Proceedings* series B welcomes papers on any aspects of biological science. It publishes, rapidly, announcements of important results, normally not exceeding 4000 words (five printed pages). The Editor will also consider short reviews, but only if they contain original and interesting new ideas. Short additions to, or criticisms of, papers that have already been published (subject to their originality and interest, and to the rules of good manners) will also be acceptable. Preliminary reports ('letters') are not encouraged. The target publication time is three months from receipt (excluding any period that the manuscript is in the hands of the authors).

**Submission.** There is no page charge. Authors may send their papers (i) to an appropriate member of the Editorial Board, (ii) to a Corresponding Editor, (iii) to a Fellow or Foreign Member of the Society, or (iv) directly to the Editor. The recipient under (i), (ii) and (iii) will be responsible for providing the Editor with referees' reports and a recommendation on the paper's suitability for publication. Up to six keywords should be supplied with the typescript. Four copies of the typescript and figures are required, and one set of originals of any figures should also be submitted. Papers should be prepared in accordance with the Instructions to Authors printed at the end of every issue of *Proceedings B* and also available from the Editorial Office. If the author submits a paper to any of the people listed in (i), (ii) or (iii) above, she or he should write a note to the Editor informing him of the submission.

**Offprints.** Authors will receive 50 free offprints.
