The three numbers in this volume can be obtained separately from the Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.

Copyright
© 1991 The Royal Society and the authors of individual papers

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the publisher, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of this Act) for an individual for the purposes of research or private study.

The text paper used in this publication is alkaline sized with a coating which is predominantly calcium carbonate. The resultant surface pH is in excess of 7.5, which gives maximum practical permanence.

Printed in Great Britain at the University Press, Cambridge
Contents

Series B Volume 244

No. 1309 22 April 1991
A comparison of intramolecular rearrangements promoted by transposons Tn5 and Tn10
By Asad Ahmed 1
Angiotensin II receptors in Xenopus oocytes
By R. M. Woodward and R. Mileti 11
An algorithm for associating the features of two images
By Guy L. Scott and H. Christopher Longuet-Higgins 21
Longitudinal coordination of motor output during swimming in Xenopus embryos
By Mark J. Tunstall and Alan Roberts 27
Plateau potentials drive axonal impulse bursts in insect motoneurons
By Jules C. Hancox and Robert M. Pitman 33
Cortical and subcortical localization of response to pain in man using positron emission tomography
Isolation and characterization of DNA from archaeological bone
By Erika Hagleberg and J. B. Clegg 45
Kinetic differences between Ca^{2+}-dependent K^{+} channels in smooth muscle cells isolated from normal and atherosclerotic human aorta
By V. Bolettina, M. Gericke and P. Bregeostovski 51
Caffeine inhibits inositol-trisphosphate-induced membrane potential oscillations in Xenopus oocytes
By Michael J. Berridge 57
A salt-activated inositol, 1,3,4,5-tetrakisphosphate 3-phosphatase at the inner surface of the erythrocyte membrane
By Teresa Estrada-Garcia, Andrew Craxton, Christopher J. Kirk and Robert H. Michell 63

No. 1310 22 May 1991
Rings of anionic amino acids as structural determinants of ion selectivity in the acetylcholine receptor channel
By Takashi Konno, Christopher Busch, Eberhard von Kitzing, Keji Imoto, Feng Wang, Junichi Nakai, Masayoshi Mishina, Shosaku Numa and Bert Sakmann 69
Camouflage by edge enhancement in animal coloration patterns and its implications for visual mechanisms
By D. Osorio and M. V. Srinivasan 81
Does vertical disparity scale the perception of stereoscopic depth?
By Erik C. Sobel and Thomas S. Collett 87
The incidences and evolution of cytoplasmic male killers
By Laurence D. Hurst 91
Investigating a network model of word generation with positron emission tomography
By K. J. Friston, C. D. Frith, P. F. Liddle and R. S. J. Frackowiak 101
A molecular genetics study of spermine complexion to DNA: a new model for spermine–poly(dG–dC) binding
By Ian S. Haworth, Alison Rodger and W. Graham Richards 107
Possible intermediate steps in the evolution of a prokaryotic developmental system
By Jeffery Errington 117
The isolation of conserved DNA sequences related to the human sex-determining region Y gene from the lesser black-backed gull (Larus fuscus)
By Richard Griffiths 123
μ-Opioid-receptor-mediated inhibition of the N-type calcium-channel current
By Elizabeth Seward, Constance Hammond and Graeme Henderson 129
Characterization of the FNR protein of Escherichia coli, an iron-binding transcriptional regulator
By Jeffrey Green, Martin Tragereser, Stephan Six, Gottfried Unden and John R. Guest 137
Parasite loads in parthenogenetic and sexual lizards (Heteronotia binata): support for the Red Queen hypothesis
By C. Moritz, H. McCallum, S. Donnellan and J. D. Roberts 145
Processed pseudogenes in Drosophila
By Pete Jeffs and Michael Ashburner 151
Direct measurement of the action of acetylcholine on isolated outer hair cells of the guinea pig cochlea
By G. D. Housley and J. F. Ashmore 161

CD8 independence and specificity of cytotoxic T lymphocytes restricted by HLA-Aw68.1
By V. Cerundolo, A. G. D. Tse, R. D. Salter, P. Parham and A. Townsend 169

No. 1311 22 June 1991

Excitatory amino acid receptor-channels in Purkinje cells in thin cerebellar slices
By Mark Farrant and Stuart G. Cull-Candy 179

Calcium-permeable ion channels in cerebellar neurons from mdx mice
By Christine M. Haws and Jeffrey B. Lansman 185

Monitoring of intracellular ammonium in perfused rat salivary gland by nitrogen-14 nuclear magnetic
resonance spectroscopy
By YoshiTeru Seo and Masataka Murakami 191

Non-equilibrium thermodynamic sensitivity of oxidative phosphorylation
By Jörg Stucki 197

Natural selection and the scarlet tiger moth, *Panaxia dominula*: inconsistencies in the scoring of the
heterozygote, *t. medionigra*
By Cyril A. Clarke, Frieda M. M. Clarke and Denis F. Owen 203

Frameshifting by eukaryotic ribosomes during expression of *Escherichia coli* release factor 2
By B. Cameron Donly and Warren P. Tate 207

Iron(III) can be transferred between ferritin molecules
By Erika R. Bauminger, Pauline M. Harrison, Daniel Hechel, Israel Nowik and
Amyra Treffry 211

Slowly activating K⁺ channels in rat olfactory receptor neurons
By Joseph W. Lynch and Peter H. Barry 219

Macrophages direct process elongation from adult frog motorneurons in culture
By Barbara Stolz, Solomon D. Erulkar and Damien P. Kuffler 227

Afferent signals from pigeon extraocular muscles modify the vestibular responses of units in the abducens
nucleus
By I. M. L. Donaldson and P. C. Knox 233

Willed action and the prefrontal cortex in man: a study with PET
By C. D. Frith, K. Friston, P. F. Liddle and R. S. J. Frackowiak 241

Amino acid sequence of putative moult-inhibiting hormone from the crab *Carcinus maenas*
By S. G. Webster 247

Is animal behaviour chaotic? Evidence from the activity of ants
By Blaine J. Cole 253

NOTICE TO AUTHORS

Scope. Proceedings series B welcomes papers on any aspects of biological science. It publishes, rapidly, announcements of important results, normally not exceeding 4000 words (five printed pages). The Editor will also consider short Reviews, but only if they contain original and interesting new ideas. Short additions to, or criticisms of, papers that have already been published (subject to their originality and interest, and to the rules of good manners) will also be acceptable. Preliminary reports (‘letters’) are not encouraged. The target publication time is three months from receipt (excluding any period that the manuscript is in the hands of the authors).

Submission. There is no page charge. Authors may send their papers (i) to an appropriate member of the Editorial Board, (ii) to a Corresponding Editor, (iii) to a Fellow or Foreign Member of the Society, or (iv) directly to the Editor. The recipient under (i), (ii) and (iii) will be responsible for providing the Editor with referees’ reports and a recommendation on the paper’s suitability for publication. Up to six keywords should be supplied with the typescript. Four copies of the typescript and figures are required, and one set of originals of any figures should also be submitted. Papers should be prepared in accordance with the Instructions to Authors printed at the end of every issue of Proceedings B and also available from the Editorial Office. If the author submits a paper to any of the people listed in (i), (ii) or (iii) above, she or he should write a note to the Editor informing him of the submission.

Offprints. Authors will receive 50 free offprints.

COPYRIGHT: © 1991 The Royal Society and the authors of individual papers

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the publisher, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of this Act) for an individual for the purposes of research or private study.

SUBSCRIPTIONS

Proceedings of the Royal Society series B (ISSN 0080-4649) is published in monthly parts. The subscription price in 1991, including postage, is £165 in the U.K. and £176 (U.S. $352) overseas. Air-speeded post is available for overseas subscribers at a small extra charge. Full details of subscription rates may be obtained on request from the Publications Sales and Marketing Manager, The Royal Society, 6 Carlton House Terrace, London SW1Y 5AG.
