Series B Volume 250

No. 1327 22 October 1992	
The Florey Lecture, 1992. The secretion of proteins by cells By HUGH R. B. PELHAM	1
Pore size and negative charge as structural determinants of permeability in the <i>Torpedo</i> nicotinic acetylcholine receptor channel By FENG WANG and KEIJI IMOTO	11
Phylogenetic relationships of the thylacine (Mammalia: Thylacinidae) among dasyuroid marsupials: evidence from cytochrome <i>b</i> DNA sequences By CAREY KRAJEWSKI, AMY C. DRISKELL, PETER R. BAVERSTOCK and MICHAEL J. BRAUN	19
Mechanical filtering of sound in the inner ear By A. M. BROWN, S. A. GASKILL and D. M. WILLIAMS	29
Activation of L-type Ca ²⁺ currents in cardiac myocytes by photoreleased GTP By R. Z. KOZLOWSKI, L. J. GOODSTADT, V. W. TWIST and T. POWELL	35
A latitudinal cline in a <i>Drosophila</i> clock gene By RODOLFO COSTA, ALEXANDRE A. PEIXOTO, GUIDO BARBUJANI and CHARALAMBOS P. KYRIACOU	43
Role of the phosphoenolpyruvate-dependent fructose phosphotransferase system in the utilization of mannose by <i>Escherichia coli</i> By HANS L. KORNBURG and LINDA T. M. LAMBOURNE	51
Female mate preference enhances offspring growth and reproduction in a fish, <i>Poecilia reticulata</i> By JOHN D. REYNOLDS and MART R. GROSS	57
Structural and functional evidence for activation of a chick retinoid X receptor by eicosanoids By NICHOLAS S. C. EAGER, PAUL M. BRICKELL, CHRISTOPHER SNELL and JOHN N. WOOD	63
The dependence of calcium-activated potassium currents on membrane potential By A. R. MARTIN and P. A. FUCHS	71
Coloured noise or low-dimensional chaos? By LEWI STONE	77
Presynaptic enhancement of signal transients in photoreceptor terminals in the compound eye By MATTI WECKSTRÖM, MIKKO JUUSOLA and SIMON B. LAUGHLIN	83
No. 1328 23 November 1992	
<i>Wolbachia</i> endosymbionts responsible for various alterations of sexuality in arthropods By FRANÇOIS ROUSSET, DIDIER BOUCHON, BERNARD PINTUREAU, PIERRE JUCHAULT and MICHEL SOLIGNAC	91
A patch-clamp study of GABA- and strychnine-sensitive glycine-activated currents in post-natal tissue-cultured hippocampal neurons By KANEEZ FATIMA-SHAD and PETER H. BARRY	99
Modulation of swimming rhythmicity by 5-hydroxytryptamine during post-embryonic development in <i>Xenopus laevis</i> By KEITH T. SILLAR, JOHN F. S. WEDDERBURN and A. JOHN SIMMERS	107
Nitrogen recycling in the pea aphid (<i>Acyrtosiphon pisum</i>) symbiosis By L. F. WHITEHEAD, T. L. WILKINSON and A. E. DOUGLAS	115
Closure of potassium M-channels by muscarinic acetylcholine-receptor stimulants requires a diffusible messenger By A. A. SELYANKO, C. E. STANSFELD and D. A. BROWN	119
Electrophysiological characterization of a TTX-sensitive sodium current in native <i>Xenopus</i> oocytes By EMMANUEL BOURINET, JOËL NARGEOT and PIERRE CHARNET	127
The coevolution of predator-prey interactions: ESS and Red Queen dynamics By PAUL MARROW, RICHARD LAW and C. CANNINGS	133
Mortality costs of sexual dimorphism in birds By DANIEL E. L. PROMISLOW, ROBERT MONTGOMERIE and THOMAS E. MARTIN	143
Normal development of nerve-muscle synapses in mice lacking the prion protein gene By H. R. BRENNER, A. HERCZEG and B. OESCH	151
Epidemiology of anther-smut infection of <i>Silene alba</i> (= <i>S. latifolia</i>) caused by <i>Ustilago violacea</i> : patterns of spore deposition in experimental populations By JANIS ANTONOVICS and HELEN MILLER ALEXANDER	157

Contents

Preventing insect adaptation to insect-resistant crops: are seed mixtures or refugia the best strategy? By JAMES MALLET and PATRICK PORTER	165
No. 1329 22 December 1992	
Growth of axons through a lesion in the intact CNS of fetal rat maintained in long-term culture By N. R. SAUNDERS, P. BALKWILL, G. KNOTT, M. D. HABGOOD, K. MØLLGÅRD, J. M. TREHERNE and J. G. NICHOLLS	171
K ⁺ -channel blockers restore synaptic plasticity in the neuromuscular junction of <i>dunce</i> , a <i>Drosophila</i> learning and memory mutant By RICARDO DELGADO, RAMON LATORRE and PEDRO LABARCA	181
Synaptic connections of physiologically identified geniculocortical axons in kitten cortical area 17 By JOHN C. ANDERSON, COLETTE DEHAY, MICHAEL J. FRIEDLANDER, KEVAN A. C. MARTIN and J. CHARMAINE NELSON	187
A kin selection model for the evolution of virulence By STEVEN A. FRANK	195
Reciprocal role of the inward currents $i_{b,Na}$ and i_t in controlling and stabilizing pacemaker frequency of rabbit sino-atrial node cells By D. NOBLE, J. C. DENYER, H. F. BROWN and D. DI FRANCESCO	199
Different channel-gating properties of two classes of cyclic GMP-activated channel in vertebrate photoreceptors By V. TORRE, M. STRAFORINI, F. SESTI and T. D. LAMB	209
Nonlinear mechanical responses of mouse cochlear hair bundles By I. J. RUSSELL, M. KÖSSL and G. P. RICHARDSON	217
Costs influence sequential mate choice in sticklebacks, <i>Gasterosteus aculeatus</i> By MANFRED MILINSKI and THEO C. M. BAKKER	229
Kinetics of intracellular calcium release by inositol 1,4,5-trisphosphate and extracellular ATP in porcine cultured aortic endothelial cells By THOMAS D. CARTER and DAVID OGDEN	235
Detection and processing of vertical disparity by the human observer By GERALD WESTHEIMER and MARK W. PETTET	243
Modelling the immune response to malaria with ecological concepts: short-term behaviour against long- term equilibrium By BARBARA HELLRIEGEL	249
Statistical geometry of pancreatic islets By H. M. HASTINGS, B. S. SCHNEIDER, M. A. SCHREIBER, K. GORRAY, G. MAYTAL and J. MAIMON	257
Poisson sampling-based inference for single ion channel data with time interval omission By F. G. BALL, A. CHEN and M. S. P. SANSOM	263
Single-channel conductances of NMDA receptors expressed from cloned cDNAs: comparison with native receptors By PETER STERN, PHILIPPE BÉHÉ, RALF SCHOEFFER and DAVID COLQUHOUN	271
Rapid decay of averaged single-channel NMDA receptor activations recorded at low agonist concentration By B. EDMONDS and D. COLQUHOUN	279
The glial spike theory. I. On an active role of neuroglia in spreading depression and migraine By DAVID H. LEIBOWITZ	287
A computational model of the analysis of some first-order and second-order motion patterns by simple and complex cells By A. JOHNSTON, P. W. McOWAN and H. BUXTON	297
A combination of human α_1 and β_1 subunits is required for formation of detectable GABA-activated chloride channels in Sf9 cells By B. BIRNIR, M. L. TIERNEY, S. M. HOWITT, G. B. COX and P. W. GAGE	307
Instructions to Authors	313
Indexes	315
