Contents

Series B Volume 250

No. 1327  22 October 1992

The Florey Lecture, 1992. The secretion of proteins by cells
By Hugh R. B. Pelham  1

Pore size and negative charge as structural determinants of permeability in the Torpedo nicotinic acetylcholine receptor channel
By Feng Wang and Keiji Imoto  11

Phylogenetic relationships of the thylacine (Mammalia: Thylacinidae) among dasypodid marsupials: evidence from cytome and bDNA sequences
By Carey Krajezski, Amy C. Driskell, Peter R. Baeverstock and Michael J. Braun  19

Mechanical filtering of sound in the inner ear
By A. M. Brown, S. A. Gaskell and D. M. Williams  29

Activation of L-type Ca2+ currents in cardiac myocytes by photoreleased GTP
By R. Z. Kozlowski, L. J. Goodstadt, V. W. Twist and T. Powell  35

A latitudinal cline in a Drosophila clock gene
By Rodolfo Costa, Alexandre A. Peixoto, Guido Barbujani and Charalampos P. Kyriacou  43

Role of the phosphoenolpyruvate-dependent fructose phosphotransferase system in the utilization of mannose by Escherichia coli
By Hans L. Kornberg and Linda T. M. Lambourne  51

Female mate preference enhances offspring growth and reproduction in a fish, Poecilia reticulata
By John D. Reynolds and Mart R. Gross  57

Structural and functional evidence for activation of a chick retinoid X receptor by eicosanoids
By Nicholas S. C. Eager, Paul M. Brickell, Christopher Snell and John N. Wood  63

The dependence of calcium-activated potassium currents on membrane potential
By A. R. Martin and P. A. Fuchs  71

Coloured noise or low-dimensional chaos?
By Lewi Stone  77

Presynaptic enhancement of signal transients in photoreceptor terminals in the compound eye
By Matti Weckström, Mikko Juusola and Simon B. Laughlin  83

No. 1328  23 November 1992

Walbachia endosymbionts responsible for various alterations of sexuality in arthropods
By Françoise Rouset, Didier Bouchon, Bernard Pintureau, Pierre Juchault and Michel Solignac  91

A patch-clamp study of GABA- and strychnine-sensitive glycine-activated currents in post-natal tissue-cultured hippocampal neurons
By Kaneez Fatma-Shad and Peter H. Barry  99

Modulation of swimming rhythmicity by 5-hydroxytryptamine during pre-embryonic development in Xenopus laevis
By Keith T. Sellar, John F. S. Wedderburn and A. John Simmers  107

Nitrogen recycling in the pea aphid (Acyrthosiphon pisum) symbiosis
By L. F. Whitehead, T. L. Wilkinson and A. E. Douglas  115

Closure of potassium M-channels by muscarinic acetylcholine-receptor stimulants requires a diffusible messenger
By A. A. Selyanko, C. E. Stansfeld and D. A. Brown  119

Electrophysiological characterization of a TTX-sensitive sodium current in native Xenopus oocytes
By Emmanuel Bourinet, Jöel Nargeot and Pierre Charette  127

The coevolution of predator–prey interactions: ess and Red Queen dynamics
By Paul Marrow, Richard Law and C. Cannings  133

Mortality costs of sexual dimorphism in birds
By Daniel L. Promislow, Robert Montgomery and Thomas E. Martin  143

Normal development of nerve–muscle synapses in mice lacking the prion protein gene
By H. R. Brenner, A. Herczeg and B. Osch  151

Epidemiology of anther-smut infection of Silene alba (=S. latifolia) caused by Ustilago violacea: patterns of spore deposition in experimental populations
By Janis Antonovics and Helen Miller Alexander  157
Contents

Preventing insect adaptation to insect-resistant crops: are seed mixtures or refugia the best strategy? 165
By James Mallet and Patrick Porter

No. 1329 22 December 1992
Growth of axons through a lesion in the intact CNS of fetal rat maintained in long-term culture 171
By N. R. Saunders, P. Balkwill, G. Knott, M. D. Habgood, K. Molgaard, J. M. Treherne and
J. G. Nickolls
K+-channel blockers restore synaptic plasticity in the neuromuscular junction of drosophila learning
and memory mutant 181
By Ricardo Delgado, Ramon Latorre and Pedro Labarca
Synaptic connections of physiologically identified geniculocortical axons in kitten cortical area 17 187
By John C. Anderson, Colette Dehay, Michael J. Friedlander, Kevan A. C. Martin and
J. Charnaine Nelson
A kin selection model for the evolution of virulence 195
By Steven A. Frank
Reciprocal role of the inward currents i_{h,Na} and i_{i} in controlling and stabilizing pacemaker frequency of
rabbit sino-atrial node cells 199
By D. Noble, J. C. Denyer, H. F. Brown and D. DiFrancesco
Different channel-gating properties of two classes of cyclic GMP-activated channel in vertebrate
photoreceptors 209
By V. Torre, M. Straforini, F. Sesti and T. D. Lamb
Nonlinear mechanical responses of mouse cochlear hair bundles 217
By I. J. Russell, M. Kössl and G. P. Richardson
Costs influence sequential mate choice in sticklebacks, Gasterosteus aculeatus 229
By Manfred Milinski and Theo C. M. Bakker
Kinetics of intracellular calcium release by inositol 1,4,5-trisphosphate and extracellular ATP in porcine
cultured aortic endothelial cells 235
By Thomas D. Carter and David Ogden
Detection and processing of vertical disparity by the human observer 243
By Gerald Westheimer and Mark W. Pettet
Modelling the immune response to malaria with ecological concepts: short-term behaviour against long-
eterm equilibrium 249
By Barbara Hellriegel
Statistical geometry of pancreatic islets 257
By H. M. Hastings, B. S. Schneider, M. A. Schreiber, K. Gorray, G. Maytal and J. Maimon
Poisson sampling-based inference for single ion channel data with time interval omission 263
By F. G. Ball, A. Chen and M. S. P. Sansom
Single-channel conductances of NMDA receptors expressed from cloned cDNAs: comparison with native
receptors 271
By Peter Stern, Philippe Béhé, Ralf Schoepfcr and David Colquhoun
Rapid decay of averaged single-channel NMDA receptor activations recorded at low agonist concentration 279
By B. Edmonds and D. Colquhoun
The glial spike theory. I. On an active role of neuroglia in spreading depression and migraine 287
By David H. Lewitwitz
A computational model of the analysis of some first-order and second-order motion patterns by simple and
complex cells 297
By A. Johnston, P. W. McOwan and H. Buxton
A combination of human α₂ and β₃ subunits is required for formation of detectable GABA-activated
chloride channels in S9 cells 307
By B. Birnir, M. L. Tierney, S. M. Howitt, G. B. Cox and P. W. Gage
