The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:

- recognise excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- promote the public's understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsoc.ac.uk).

Research Support (UK grants and fellowships)
Research grants: 2539
Conference grants: 2540

Science Advice
general enquiries: 2550

Science Communication
general enquiries: 2572

International Exchanges (for grants enabling research visits between the UK and other countries (except the USA))
general enquiries: 2550

Library and Information Services
library/archive enquiries: 2606

Cover image: Pat, a six-year-old chimpanzee (Pan troglodytes), in an outdoor enclosure at the Wolfgang Kohler Primate Research Centre using a begging gesture to request food from her keepers. Chimpanzees may not share the human sensitivity to fairness and the needs of others, at least when food is involved. For instance, Pat’s mother would rarely (if ever) actively share food with her (see pages 1013–1021, photograph, Katrin Rud; MPI-EUK, Leipzig, Germany).

GUIDANCE FOR AUTHORS

Selection criteria

The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports of articles that mainly confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Publishing format

Proc. R. Soc. B articles are published regularly online and in bi-monthly print issues. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although papers are limited to ten journal pages in length (with a page-charge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

The printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Electronic submission details

The Royal Society’s electronic-submission and peer-review service provides Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, see www.pubs.royal学会.ac.uk/proceedingsb for further details.

AIMS AND SCOPE

Research Proc. R. Soc. B welcomes articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology, in the widest sense, and behavioural and evolutionary biology. Proc. R. Soc. B has also published significant numbers of papers in epidemiology, human biology, neuroscience, palaeontology and biogeography. Authors are encouraged to submit articles not only in these fields, but in all branches of biology. The criteria for scientific excellence, originality and potential interest to a wide spectrum of biologists.

Review papers. The journal also publishes topical reviews or emerging areas of biological science that will be of interest to non-specialists. Topical reviews are commissioned but unsolicited submissions will be considered.

Comment papers. Short additions to, or criticisms of, papers already published will also be considered. At the discretion of the editors, the author(s) of the original paper may be invited to reply. Comment papers should be short, interesting and conform to the rules of good manners.

COPYRIGHT

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any other means, with the prior permission in writing of the publisher, or in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from any form or by any other means, with the prior permission in writing of the publisher, or in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

SUBSCRIPTIONS

In 2006 Proc. R. Soc. B (ISSN 0962-4452) will be published twice a month. Full details of subscriptions may be obtained from the Subscription Sales Department, The Royal Society, 6–9 Carlton House Terrace, London SW1Y 5AG. Tel +44 (020) 7451 2646; fax +44 (020) 7976 1837; email sales@royalsoc.ac.uk. The Royal Society is Registered Charity No.207043.

Typeset in Europe by the Alden Group, Oxford. Printed by Latimer Trend, Plymouth.

The printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Proc. R. Soc. B employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic submission details

The Royal Society’s electronic-submission and peer-review service provides Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system.
