Review. Short RNAs in environmental adaptation
T. Dalmay
Regional heterogeneity and gene flow maintain variance in a quantitative trait within populations of lodgepole pine
S. Waman & A. Jarvis
Origins and evolution of the Europeans’ genome: evidence from multiple microsatellite loci
E. M. S. Belle, P.-A. Landry & G. Barbujani
Evolutionary history of a mosquito endosymbiont revealed through mitochondrial hitchhiking
J. L. Rasgon, A. J. Cornel & T. W. Scott
Sequence variation in the coding region of the melanocortin-1 receptor gene (MC1R) is not associated with plumage variation in the blue-crowned manakin (Lepidothrix coronata)
Z. A. Cheviron, S. J. Hackett & R. T. Brumfield
Comparative analyses of the influence of developmental mode on phenotypic diversification rates in shorebirds
G. H. Thomas, R. P. Freckleton & T. Jolly
Senescence effects in an extremely long-lived bird: the grey-headed albatross
Thalassarche chrysostoma
P. Catry, R. A. Phillips, B. Phalan & J. P. Croxall
Adaptive significance of death feigning posture as a specialized inducible defence against gape-limited predators
A. Honma, S. Oku & T. Nishida
Does colonization asymmetry matter in metapopulations?
S. Velleurier & H. P. Possingham
Recent and simultaneous origins of eusociality in halictid bees
S. G. Brady, S. Sipes, A. Pearson & B. N. Darlton
Mechanistic home range models capture spatial patterns and dynamics of coyote territories in Yellowstone
P. R. Moorcroft, M. A. Lewis & R. L. Crabtree
Visually mediated species and neighbour recognition in fiddler crabs
(Uca mjoeberti and Uca capacirnis)
T. Detto, P. R. Y. Backwell, J. M. Hemm & J. Zell
Why do red and dark-coloured cars lure aquatic insects? The attraction of water insects to car paintwork explained by reflection-polarization signals
G. Kriska, Z. Csabai, P. Boda, P. Malik & G. Horváth
Copepods induce paralytic shellfish toxin production in marine dinoflagellates
E. Selander, P. Thor, G. Toth & H. Pavia
Polygyny and its fitness consequences for primary and secondary female pied flycatchers
T. Huk & W. Winkl
Role of avidity and breadth of the CD4 T cell response in progression to AIDS
H. K. Altes, R. de Boer & M. Boerlijst
Assembling spatially explicit landscape models of pollen and spore dispersal by wind for risk assessment
