

|  |     |
|--|-----|
| <b>Review. Future directions in behavioural syndromes research</b><br>A. M. Bell   | 755 |
| <b>Big-brained birds survive better in nature</b><br>D. Sol, T. Székely, A. Liker & L. Lefebvre  | 763 |
| <b>Can artificially selected phenotypes influence a component of field fitness? Thermal selection and fly performance under thermal extremes</b><br>T. N. Kristensen, V. Loeschcke & A. A. Hoffmann  | 771 |
| <b>Surviving with low genetic diversity: the case of albatrosses</b><br>E. Milot, H. Weimerskirch, P. Duchesne & L. Bernatchez   | 779 |
| <b>Warm water occupancy by North Sea cod</b><br>F. Neat & D. Righton   | 789 |
| <b>Food plant diversity as broad-scale determinant of avian frugivore richness</b><br>W. D. Kissling, C. Rahbek & K. Böhning-Gaese   | 799 |
| <b>Stability of genetic polymorphism in host–parasite interactions</b><br>A. Tellier & J. K. M. Brown  | 809 |
| <b>Testosterone and oxidative stress: the oxidation handicap hypothesis</b><br>C. Alonso-Alvarez, S. Bertrand, B. Faivre, O. Chastel & G. Sorci  | 819 |
| <b>Individuals from different-looking animal species may group together to confuse shared predators: simulations with artificial neural networks</b><br>C. R. Tosh, A. L. Jackson & G. D. Ruxton   | 827 |
| <b>What is the best control strategy for multiple infectious disease outbreaks?</b><br>A. Handel, I. M. Longini Jr & R. Antia  | 833 |
| <b>Intraspecific competition drives increased resource use diversity within a natural population</b><br>R. Svanbäck & D. I. Bolnick  | 839 |
| <b>The use of chemical and visual cues in female choice in the butterfly <i>Bicyclus anynana</i></b><br>K. Costanzo & A. Monteiro  | 845 |
| <b>Social competitiveness associated with rapid fluctuations in sperm quality in male fowl</b><br>T. Pizzari, C. K. Cornwallis & D. P. Froman  | 853 |
| <b>Natural selection acts on Atlantic salmon major histocompatibility (MH) variability in the wild</b><br>E. de Eyto, P. McGinnity, S. Consuegra, J. Coughlan, J. Tufto, K. Farrell, H.-J. Megens, W. Jordan, T. Cross & R. J. M. Stet                                       | 861 |
| <b>From selection to complementarity: shifts in the causes of biodiversity–productivity relationships in a long-term biodiversity experiment</b><br>J. Fargione, D. Tilman, R. Dybzinski, J. H. R. Lambers, C. Clark, W. S. Harpole, J. M. H. Knops, P. B. Reich & M. Loreau | 871 |
| <b>Communication using eye roll reflective signalling</b><br>I. Novales Flamarique, G. A. Mueller, C. L. Cheng & C. R. Figiel  | 877 |
| <b>Maternal nutrition affects reproductive output and sex allocation in a lizard with environmental sex determination</b><br>D. A. Warner, M. B. Lovern & R. Shine   | 883 |
| <b>Did the perils of abdominal obesity affect depiction of feminine beauty in the sixteenth to eighteenth century British literature? Exploring the health and beauty link</b><br>D. Singh, P. Renn & A. Singh   | 891 |
| <b>Spitting out information: <i>Trigona</i> bees deposit saliva to signal resource locations</b><br>D. L. P. Schorkopf, S. Jarau, W. Francke, R. Twele, R. Zucchi, M. Hrncir, V. M. Schmidt, M. Ayasse & F. G. Barth   | 895 |
| <b>Social transmission of face preferences among humans</b><br>B. C. Jones, L. M. DeBruine, A. C. Little, R. P. Burriss & D. R. Feinberg   | 899 |

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
