The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:
- recognize excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- promote the public's understanding of science
- provide independent authoritative advice on matters relating to science, engineering, and technology
- encourage research into the history of science

For further information on the Society's activities, please contact the following departments on the extensions listed by dialing +44 (020) 7839 5561, or visit the Society's Web site at www.royalsoc.ac.uk.

Research support
- UK grants and fellowships
- Research grants and contracts
- Research grants: 2539
- Conference grants: 2540

Science Advice
- General enquiries: 2583

Science Communication
- General enquiries: 2572

Library and Information Services
- Library/archives enquiries: 2006

Cover image: A new species of the chameleon-like, meat-eating theropod dinosaur Sinoasaurus from the famed Jehol Biota, Liaoning, China; it shows rare preservation of soft tissue (UV light). (See pages 1823–1829; photograph by Theagarten Lingham-Soliar.)
