

<b>Character-based DNA barcoding allows discrimination of genera, species and populations in Odonata</b>	<b>237</b>
J. Rach, R. DeSalle, I. N. Sarkar, B. Schierwater & H. Hadrys	
<b>Pattern and timing of diversification in <i>Yucca</i> (Agavaceae): specialized pollination does not escalate rates of diversification</b>	<b>249</b>
C. I. Smith, O. Pellmyr, D. M. Althoff, M. Balcázar-Lara, J. Leebens-Mack & K. A. Segraves	
<b>Harmless nectar source or deadly trap: <i>Nepenthes</i> pitchers are activated by rain, condensation and nectar</b>	<b>259</b>
U. Bauer, H. F. Bohn & W. Federle	
<b>Novel symptomatology and changing epidemiology of domoic acid toxicosis in California sea lions (<i>Zalophus californianus</i>): an increasing risk to marine mammal health</b>	<b>267</b>
T. Goldstein, J. A. K. Mazet, T. S. Zabka, G. Langlois, K. M. Colegrove, M. Silver, S. Bargu, F. Van Dolah, T. Leighfield, P. A. Conrad, J. Barakos, D. C. Williams, S. Dennison, M. Haulena & F. M. D. Gulland	
<b>The genetic basis of parallel and divergent phenotypic responses in evolving populations of <i>Escherichia coli</i></b>	<b>277</b>
E. A. Ostrowski, R. J. Woods & R. E. Lenski	
<b>Nest-mate recognition in <i>Manuelia postica</i> (Apidae: Xylocopinae): an eusocial trait is present in a solitary bee</b>	<b>285</b>
L. Flores-Prado, D. Aguilera-Olivares & H. M. Niemeyer	
<b>Population dynamics of defensive symbionts in aphids</b>	<b>293</b>
K. M. Oliver, J. Campos, N. A. Moran & M. S. Hunter	
<b>Parental conflict in birds: comparative analyses of offspring development, ecology and mating opportunities</b>	<b>301</b>
V. A. Olson, A. Liker, R. P. Freckleton & T. Székely	
<b>Oxidative stress does not influence carotenoid mobilization and plumage pigmentation</b>	<b>309</b>
C. Isaksson & S. Andersson	
<b>Crowding, sex ratio and horn evolution in a South African beetle community</b>	<b>315</b>
J. C. Pomfret & R. J. Knell	
<b>Experimental alteration of litter sex ratios in a mammal</b>	<b>323</b>
E. Z. Cameron, P. R. Lemons, P. W. Bateman & N. C. Bennett	
<b>Persistence of the emerging pathogen <i>Batrachochytrium dendrobatidis</i> outside the amphibian host greatly increases the probability of host extinction</b>	<b>329</b>
K. M. Mitchell, T. S. Churcher, T. W. J. Garner & M. C. Fisher	
<b>The effect of stimuli that isolate S-cones on early saccades and the gap effect</b>	<b>335</b>
A. J. Anderson & R. H. S. Carpenter	
<b>Cheating honeybee workers produce royal offspring</b>	<b>345</b>
L. A. Jordan, M. H. Allsopp, B. P. Oldroyd, T. C. Wossler & M. Beekman	

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
