The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:
- recognise excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the science, engineering and technology in society
- promote the public’s understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society's activities, please contact the following departments on the extensions listed below:
- Science Advice: 2540
- Conference grants: 2547
- Research appointments: 2549
- Research support (UK grants and fellowships): 2539
- General enquiries: 2527
- Science Communication: 2529
- International exchanges (for grants enabling research visits between the UK and other countries): 2531
- Library and Information Services: 2535

The Royal Society's electronic submission and peer review service, provides an easy and cost-effective way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how the paper will be handled. Your paper will then be sent out for independent review. Depending on the reviewers comments, your paper will undergo a decision either to accept it as submitted, or to accept it conditionally, or to reject it.
