

Running, swimming and diving modifies neuroprotecting globins in the mammalian brain	751
T. M. Williams, M. Zavanelli, M. A. Miller, R. A. Goldbeck, M. Morledge, D. Casper, D. A. Pabst, W. McLellan, L. P. Cantin and D. S. Kliger	
Recovery from the most profound mass extinction of all time	759
S. Sahney and M. J. Benton	
A clear human footprint in the coral reefs of the Caribbean	767
C. Mora	
A unique cross section through the skin of the dinosaur <i>Psittacosaurus</i> from China showing a complex fibre architecture	775
T. Lingham-Soliar	
Compensatory growth and oxidative stress in a damselfly	781
M. De Block and R. Stoks	
Population dynamics and sex ratio of a parasitoid altered by fungal-infected diet of host butterfly	787
S. van Nouhuys and A.-L. Laine	
Multimodal signals enhance decision making in foraging bumble-bees	797
I. G. Kulahci, A. Dornhaus and D. R. Papaj	
The correlation of learning speed and natural foraging success in bumble-bees	803
N. E. Raine and L. Chittka	
Genetic diversity within honeybee colonies increases signal production by waggle-dancing foragers	809
H. R. Mattila, K. M. Burke and T. D. Seeley	
How populations persist when asexuality requires sex: the spatial dynamics of coping with sperm parasites	817
H. Kokko, K. U. Heubel and D. J. Rankin	
The trade-off between number and size of offspring in humans and other primates	827
R. S. Walker, M. Gurven, O. Burger and M. J. Hamilton	
Observational learning in chimpanzees and children studied through 'ghost' conditions	835
L. M. Hopper, S. P. Lambeth, S. J. Schapiro and A. Whiten	
Synaesthetic colours do not camouflage form in visual search	841
C. Gheri, S. Chopping and M. J. Morgan	
Donning your enemy's cloak: ground squirrels exploit rattlesnake scent to reduce predation risk	847
B. Clucas, D. H. Owings and M. P. Rowe	
A quantitative test of the relationship between parasite dose and infection probability across different host–parasite combinations	853
F. Ben-Ami, R. R. Regoes and D. Ebert	
Reproduction and nutritional stress are risk factors for Hendra virus infection in little red flying foxes (<i>Pteropus scapulatus</i>)	861
R. K. Plowright, H. E. Field, C. Smith, A. Divljan, C. Palmer, G. Tabor, P. Daszak and J. E. Foley	

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
