The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The society has three roles, as a scientific academy of the UK and Commonwealth, as a learned society, and as a funding body.

AIMS AND SCOPE
Research papers, Proc. R. Soc. B welcomes articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology in the widest sense, and behavioural biology. The journal aims to stimulate international interaction, further the role of science, engineering and technology in society, promote the public's understanding of science, and encourage research into the history of science.

Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplines within biology. Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Electronic Submission details
The Royal Society’s electronic-submission and peer-review service provides Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how your paper will be handled. Supplementary data up to 10Mb is published free of charge.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsociety.org).
