Editor-in-Chief
Professor William G. Hill
Reviews Editor
Professor Michael T. Siva-Jothy
Publishing Editor
Claire Rawlinson

Editors:
Professor Elizabeth Adkins-Regan
Professor Spencer Barrett
Professor Koopman
Professor Anne Maguran
Professor Paul Rainey
Professor Nils Chr. Stenseth

GUIDANCE FOR AUTHORS

Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Publishing format
Proc. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although papers are limited to ten journal pages in length (with a per-page charge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:

• recognise excellence in science
• support leading-edge scientific research and its applications
• stimulate international interaction
• further the role of science, engineering and technology in society
• promote the public's understanding of science
• provide independent authoritative advice on matters relating to science, engineering and technology
• encourage research into the history of science

For further information on the Society's activities, please contact the following departments on the extensions listed by dialing +44 (0)20 7839 5561, or visit the Society's Web site (www.royalsociety.org).

Research Support (UK grants and fellowships)
Research grants: 2539
Conference grants: 2540
Research appointments: 2547
Research Support (UK grants and fellowships)
