Review. Revealing the paradox of drug reward in human evolution 1231
R. J. Sullivan, E. H. Hagen & P. Hammerstein

Developmental plasticity of mating calls enables acoustic communication in diverse environments 1243
O. M. Beckers & J. Schul

Novel RNA sequences associated with late male killing in Homona magnanima 1249
K. Nakanishi, M. Hoshino, M. Nakai & Y. Kunimi

Geometry explains the benefits of division of labour in a leafcutter ant 1255
H. Helanterä & F. L. W. Ratnieks

Future battlegrounds for conservation under global change 1261
T. M. Lee & W. Jetz

Chemical basis of nest-mate discrimination in the ant Formica exsecta 1271
S. J. Martin, E. Vilkkainen, H. Helanterä & F. P. Drijfhout

Pathogen prevalence predicts human cross-cultural variability in individualism/collectivism 1279
C. E. Fincher, R. Thornhill, D. R. Murray & M. Schaller

Are the small human-like fossils found on Flores human endemic cretins? 1287
P. J. Obendorf, C. E. Oxnard & B. J. Kefford

Size-dependent resistance of protected areas to land-use change 1297
L. Maierano, A. Falcucci & L. Boitani

Comparing the strength of behavioural plasticity and consistency across situations: animal personalities in the hermit crab Pagurus bernhardus 1305
M. Britta, S. D. Rundle & A. Fryer

Strategic adjustment of begging effort by banded mongoose pups 1313
M. R. V. Bell

Informational conflicts created by the waggle dance 1321
C. Grüter, M. S. Balbuena & W. M. Farina

Pushing versus pulling: division of labour between tarsal attachment pads in cockroaches 1329
C. J. Clemente & W. Federle

Function of bright coloration in the wasp spider Argiope bruennichi (Araneae: Araneidae) 1337
A. A. Bush, D. W. Yu & M. E. Herberstein

Exposure to pesticides impairs the expression of fish ornaments reducing the availability of attractive males 1343
O. Arellano-Aguilar & C. Macías García
