AIMS AND SCOPE
Research papers, Proc. R. Soc. B welcomes articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology in the widest sense, and behavioural and evolutionary biology. Proc. R. Soc. B also publishes significant numbers of papers in epidemiology, human biology, neuroscience, palaeontology and systematics. Authors are encouraged to submit articles not only to these fields, but in all branches of biology. The criteria for selection are scientific excellence, originality and potential interest to a wide spectrum of biologists.

Review papers. The journal also publishes topical reviews in emerging areas of biological science that will be of interest to non-specialists. Reviews are commissioned but unsolicited submissions will be considered.

Comment papers. Short additions to, or criticisms of, papers already published in this journal also will be considered. At the discretion of the editor, the authors of the original paper may be invited to reply. Comment papers should be short, interesting and conform to the rules of good manners.

EDITORIAL BOARD

Professor William G. Hill, Editor
Professor Michael T. Siva-Jothy, Publishing Editor
Claire Rawlinson

Authors are invited to submit articles not only in these fields, but in all branches of biology. The criteria for selection are scientific excellence, originality and potential interest to a wide spectrum of biologists.

Comment papers. Short additions to, or criticisms of, papers already published in this journal also will be considered. At the discretion of the editor, the authors of the original paper may be invited to reply. Comment papers should be short, interesting and conform to the rules of good manners.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the British kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:
- recognise excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- promote the public's understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society's activities, please contact the following departments on the extensions listed by dialing +44 (0)20 7839 5561, or visit the Society’s Web site (www.royalsociety.org).

Research Support (UK grants and fellowships)
Research grants, submitted 14 December 2007
Research grants, 2539
Conference grants, 2540

Science Advice
Cromwell enquiries, 2583

Science Communication
General enquiries, 2572

International Exchanges (for grants enabling research visits between the UK and most other countries (except the USA))
Cromwell enquiries, 2555

Library and Information Services
Library/archives enquiries, 2606
