

Editorial: <i>Proceedings B</i> – a journal for organismal and population biological work of broad interest	2537
N. Chr. Stenseth	
Can't tell the caterpillars from the trees: countershading enhances survival in a woodland	2539
H. M. Rowland, I. C. Cuthill, I. F. Harvey, M. P. Speed & G. D. Ruxton	
Automatic imitation in budgerigars	2547
R. Mui, M. Haselgrove, J. Pearce & C. Heyes	
The look of royalty: visual and odour signals of reproductive status in a paper wasp	2555
I. C. Tannure-Nascimento, F. S. Nascimento & R. Zucchi	
The paradox of enrichment in an adaptive world	2563
A. Mougi & K. Nishimura	
Modelling genetic regulation of growth and form in a branching sponge	2569
J. A. Kaandorp, J. G. Blom, J. Verhoef, M. Filatov, M. Postma & W. E. G. Müller	
Pre-power stroke cross bridges contribute to force during stretch of skeletal muscle myofibrils	2577
D. E. Rassier	
Assortative sociality, limited dispersal, infectious disease and the genesis of the global pattern of religion diversity	2587
C. L. Fincher & R. Thornhill	
Roots, shoots and reproduction: sexual dimorphism in size and costs of reproductive allocation in an annual herb	2595
M. S. Harris & J. R. Pannell	
Learning by embryos and the ghost of predation future	2603
A. Mathis, M. C. O. Ferrari, N. Windel, F. Messier & D. P. Chivers	
Relative growth rates of predator and prey dinosaurs reflect effects of predation	2609
L. N. Cooper, A. H. Lee, M. L. Taper & J. R. Horner	
Gradients of precipitation and ant abundance may contribute to the altitudinal range limit of subsocial spiders: insights from a transplant experiment	2617
J. Purcell & L. Avilés	
Fungal endosymbionts of plants reduce lifespan of an aphid secondary parasitoid and influence host selection	2627
S. A. Härril, J. Krauss & C. B. Müller	
Interactions between environmental factors can hide isolation by distance patterns: a case study of <i>Ctenomys rionegrensis</i> in Uruguay	2633
M. J. Kittlein & O. E. Gaggiotti	
Dazzle coloration and prey movement	2639
M. Stevens, D. H. Yule & G. D. Ruxton	
Acoustic experience shapes female mate choice in field crickets	2645
N. W. Bailey & M. Zuk	
In your face: facial metrics predict aggressive behaviour in the laboratory and in varsity and professional hockey players	2651
J. M. Carré & C. M. McCormick	

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
