AIMS AND SCOPE
Research papers. Proc. R. Soc. B is welcome articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology in the wider sense, and behavioural and evolutionary biology. Proc. R. Soc. B also publishes significant numbers of articles in epidermiology, human biology, neuroscience, palaeontology and biomineralisation. Authors are encouraged to submit articles not only in these fields, but in all branches of biology. The criteria for the selection of scientific excellence, originality and potential interest to a wide spectrum of biologists, the Editors may also encourage research into the history of science, promote the public’s understanding of science, support leading-edge scientific research and its applications, and support leading-edge scientific research and its applications, and disseminate research results among the public. However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Proc. R. Soc. B employs a strict embargo policy where the release date of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic Submission details
The Royal Society’s electronic-submission and peer-review service provides Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rspb.royalsocietypublishing.org.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:
- recognise excellence in science
- support leading-edge scientific research and its applications
- stimulate international interaction
- further the role of science, engineering and technology in society
- improve the public’s understanding of science
- provide independent authoritative advice on matters relating to science, engineering and technology
- encourage research into the history of science

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialing +44 (0)20 7839 5361, or visit the Society’s Web site (royalsociety.org).

Science Advice
Research grants: 2537
Conference grants: 2537

Science Communication
General enquiries: 2572

International Exchanges (for grants enabling research visits between the UK and most other countries) (except the USA)
General enquiries: 2550

Library and Information Services
Library/archive enquires: 2606

Cover image: Colony of Cuminumia bicornia, a common free-living bryozoan with a 10 million year fossil record in the Caribbean. Radial symmetry reveals this colony was produced sexually.
