In 2010
SUBSCRIPTIONS
this Act) for an individual for the purposes of research or private study.
Exempted from the Act are all articles published in electronic format and Copyright, Designs and Patents Act, 1988, this publication... be deposited in recognised public domain databases by the author.

Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplinary boundaries. The Editors are responsible for editorial decisions and they make those decisions based on the reports received from the referees and/or Editorial Board members.
Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary papers, of articles that merely confirm previous findings, and of articles which are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it clearly unlikely that they will be accepted.

Publishing format
Proc. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to achieving and providing perpetual access. Although papers are limited to ten journal pages in length (with a pagecharge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

The Royal Society is an independent scientific academy founded in 1660 and self-governing under Royal Charter. The Society has three roles, as the scientific academy of the United Kingdom, as a learned society, and as a funding body.

Objectives of the Royal Society are to:

• recognise excellence in science
• support leading-edge scientific research and its applications
• stimulate international interaction
• further the role of science, engineering and technology in society
• promote the public understanding of science
• provide independent authoritative advice on matters relating to science, engineering and technology
• encourage research into the history of science

For further information on the Society’s activities, please contact a member of the Publications Department or visit the Society’s website for current information.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the main media. Like many journals, Proc. R. Soc. B employs a strict embargo policy where the release of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic Submission details
The Royal Society's electronic-submission and peer-review service provides: Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see
