Review articles
Re-evaluating the costs and limits of adaptive phenotypic plasticity 503
J. R. Auld, A. A. Agrawal & R. A. Relyea

Research articles
The increased risk of predation enhances cooperation 513
I. Krams, A. Bezˇrəcˇ, T. Kramer, D. Wheatcroft, K. Igraune & M. J. Rantala
Thermoregulatory behaviour affects prevalence of chytrid fungal infection in a wild population of Panamanian golden frogs 519
C. L. Richards-Zawacki
Culture-gene coevolution of individualism-collectivism and the serotonin transporter gene 529
J. Y. Chiao & K. D. Blokinscy
Treatment-based Markov chain models clarify mechanisms of invasion in an invaded grassland community 539
L. C. Nelis & J. T. Wootton
Interspecific aggression and character displacement of competitor recognition in Heterorina damselflies 549
C. N. Anderson & G. F. Grether
The role of population heterogeneity and human mobility in the spread of pandemic influenza 557
S. Metter & M. Ajell
Grandma plays favourites: X-chromosome relatedness and sex-specific childhood mortality 567
M. Fox, R. J. Deal, J. Boie, C. Ragland, E. Voland & J. A. Knapp
Kin structure, ecology and the evolution of social organization in shrimps: a comparative analysis 575
J. E. Duffy & R. S. Macdonald
Female’s courtship threshold allows intruding males to mate with reduced effort 585
J. A. Stoltz & M. C. B. Andrade
Intensive fish farming and the evolution of pathogen virulence: the case of columnaris disease in Finland 593
The effect of personality on social foraging: shy barnacle geese scrounge more 601
Caste-specific expression of genetic variation in the size of antibiotic-producing glands of leaf-cutting ants 609
W. O. H. Hughes, A. N. M. Bot & J. Boomma
Facial cues of dominance modulate the short-term gaze-cuing effect in human observers 617
Are fast explorers slow reactors? Linking personality type and anti-predator behaviour 625
K. A. Jones & J. C. Godin
Who infects whom? Social networks and tuberculosis transmission in wild meerkats 633
J. A. Driwe
Mutational neighbourhood and mutation supply rate constrain adaptation in Pseudomonas aeruginosa 643
A. R. Hall, V. F. Griffiths, R. C. MacLean & N. Colegrave
Imitation explains the propagation, not the stability of animal culture 651
N. Claudière & D. Speker
