Review articles
Refugia revisited: individualistic responses of species in space and time
J. R. Stewart, A. M. Lister, I. Barnes & L. Dalén

Comments and invited replies
Assortment, Hamilton’s rule and multilevel selection
P. Bijma & D. K. Aanen
Assortment is a more fundamental explanation for the evolution of altruism than inclusive fitness or multilevel selection: reply to Bijma and Aanen
J. A. Fletcher & M. Doebeli

Research articles
Philopatry and migration of Pacific white sharks

Multiple speciation events in an arthropod with divergent evolution in sexual morphology
T. Itoš & T. Yatabe

Genetic analyses of historic and modern marbled murrelets suggest decoupling of migration and gene flow after habitat fragmentation

Scaling of swim speed and stroke frequency in geometrically similar penguins: they swim optimally to minimize cost of transport
R. van Woesik

Personality matters: individual variation in reactions of naïve bird predators to aposematic prey
A. Exnerová, K. H. Svádová, E. Fuciáková, P. Drent & P. Štys

Local extinction synchronizes population dynamics in spatial networks
S. F. Matter & J. Roland

Ineffective crypsis in a crab spider: a prey community perspective
R. Brechbühl, J. Cases & S. Bacher

Inhospitable sweetness: nectar filtering of pollinator-borne inocula leads to impoverished, phylogenetically clustered yeast communities
C. M. Herrera, A. Castro, M. I. Pozo & P. Bazaga

Colony fusion and worker reproduction after queen loss in army ants
D. J. C. Kronauer, C. Schöning, P. d’Ettorre & J. J. Boomsma

A single wind-mediated mechanism explains high-altitude ‘non-goal oriented’ headings and layering of nocturnally migrating insects
A. M. Reynolds, D. R. Reynolds, A. D. Smith & J. W. Chapman

A new transitional sauropodomorph dinosaur from the Early Jurassic of South Africa and the evolution of sauropod feeding and quadrupedalism
A. M. Yates, M. F. Bonnan, J. Neveling, A. Chinsamy & M. G. Blackbeard

Damped trophic cascades driven by fishing in model marine ecosystems
K. H. Andersen & M. Pedersen

The highly efficient holding function of the mollusc ‘catch’ muscle is not based on decelerated myosin head cross-bridge cycles
S. Galler, J. Litzlbauer, M. Kröss & H. Grassberger

The relationship between mutation frequency and replication strategy in positive-sense single-stranded RNA viruses

Founded in 1660, the Royal Society is the independent scientific academy of the UK, dedicated to promoting excellence in science
