Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

**Publishing format**

Proc. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although papers are limited to ten journal pages in length (with a page-charge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

**Electronic submission details**

The Royal Society’s electronic submission and peer-review service provides Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, we receive an immediate acknowledgement and send details about how you can track your online contribution.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rps.royalsocietypublishing.org

**Additional details**

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of biological science. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public, and much more. As part of this, there will be an exciting programme of activities – exhibitions, lectures, conferences, a book, a vast science festival on the South Bank in London, television and radio broadcasting and much more besides.

Our mission: to expand knowledge and further the role of science and technology in the modern world. This year we celebrate the Royal Society’s 350th anniversary.

**Copyright**

Copyright © 2010 The Royal Society

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted in any form or by any means, or a licence to reproduce granted, in accordance with the terms of a licence issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of this Act) for individual use for the purposes of research or private study.
