Cover image: An adult male White-ruffed Manakin (Ceratopipra fischeri), photographed in Costa Rican lowland forest (4 La Seku Biological Garden), which migrated down from winter flowering habitats in the Andes. Heavy rains may limit the foraging activities of these small frugivores to the extent that they risk dying during severe storms. (See pages 2511–2519; photograph by Steven Hamilton).

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of science. We support young scientists and engineers, and influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 fellows and foreign members of the Academy.

During 2010, we are celebrating the Royal Society’s 350th anniversary. As part of this, there will be an exciting programme of activities – exhibitions, lectures, conferences, a new book, a vast science festival on the South Bank in London, television and radio broadcasting and much more besides.

Our mission: to expand knowledge and further the risk of science and engineering in making the world a better place.

The Royal Society’s strategic priorities are to:

• invest in future scientific leaders and their careers
• influence policymaking with the best scientific advice
• promote science and mathematics education, increase access to the best science internationally, and
• inspire an interest in the joy, wonder and excitement of scientific discovery.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialling +44 (0)20 7839 5561, or visit the Society’s Web site (royalsociety.org).

GUIDANCE FOR AUTHORS

Selection criteria

The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Electronic Submission details

The Royal Society’s electronic submission and peer-review service provides an easy and secure method for authors to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent to details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rps.royalsocietypublishing.org.

AIMS AND SCOPE

Research papers. Proc. R. Soc. B welcomes articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology in the widest sense, and behavioural and evolutionary biology. Proc. R. Soc. B has a significant number of papers in epidemiology, human biology, medicine, palaeontology and biogeography. Authors are encouraged to submit articles not only in these fields, but in all branches of biology.

The criteria for selection are scientific excellence, originality and potential interest to a wide interdisciplinary audience. Reviews. The journal also publishes topical reviews in emerging areas of biological science that will be of interest to non-specialists. Typical reviews are commissioned but occasionally they are invited or submitted.

Comment papers. Short additions to, or criticisms of, papers already published in this journal will also be considered. At the discretion of the editors, the authors of the original paper may be invited to reply. Comment papers should be short, interesting and conform to the rules of good manners.

The Royal Society is committed to archiving and providing perpetual access. Although it is unlikely that any paper will seem unlikely that they will be accepted.

The Royal Society’s strategic priorities are to:

• invest in future scientific leaders and their careers
• influence policymaking with the best scientific advice
• promote science and mathematics education, increase access to the best science internationally, and
• inspire an interest in the joy, wonder and excitement of scientific discovery.

However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the main media. Like many journals, Proc. R. Soc. B employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Subscription prices 2010 calendar year

Europe £1100/€1437 USA/Canada $US1236 Other countries $US1210/£750

Printed version plus electronic access

Europe £1204/€1606 USA/Canada $US1384 Other countries $US1342/£856

SUBSCRIPTIONS

In 2010 Proc. R. Soc. B (ISSN 0962-8422) will be published twice a month. Full details on how to subscribe can be obtained either by contacting our journal fulfilment agent, Portland Customer Services, Commerce Way, Portland, OR 97239 USA, Tel: +1 (503) 276 7951, fax: +1 (503) 276 7931, email: sales@portland-services.com or by visiting our website at http://www.portland-services.com/subscriptions. The Royal Society is a Registered Charity No. 207043.
