The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of research, supporting young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable, non-governmental body and derive our authoritative status from over 1400 Royal Academicians (RRS members).

During 2010, we are celebrating the Royal Society’s 350th anniversary. As part of this, there will be an exciting programme of activities – exhibitions, lectures, conferences, a new book, a vast science festival on the South Bank in London, television and radio broadcasting and much more besides.

Our mission: to expand knowledge and further the risk of science and engineering in making the world a better place.

The Royal Society's strategic priorities are to:
- invest in future scientific leaders and in innovation
- influence policymaking with the best scientific advice
- disseminate science and mathematics education, increase access to the best science internationally, and
- inspire an interest in the joy, wonder and excitement of scientific discovery.

However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society's website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the main media. Like many journals, Proc. R. Soc. B deploys a strict embargo policy where the reporting of a scientific article in the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic Submission details
The Royal Society's electronic submission and peer-review service provides authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rspb.royalsocietypublishing.org.
