PROCEDINGS OF THE ROYAL SOCIETY B

Editorial Board

M. F. Hassell, Editor-in-Chief, Department of Life Sciences, Imperial College London
D. J. Adams-Regan, Editor, Department of Psychology, University of Bath
N. C. Bennett, Editor, Department of Zoology and Geology, University of Oxford
I. C. Cuthill, Editor, School of Biological Sciences, University of St Andrews
J. A. Poole, Editor, Department of Farm Animal Science, University of Cambridge
M. T. Siva-Jothy, Reviews Editor, Department of Animal and Plant Sciences, University of Cambridge
L. B. Martin, Editor, School of Life and Environmental Sciences, Deakin University
M. W. Blows, Evolutionary and Quantitative Genetics Group, University of Queensland
M. W. Funnel, Department of Zoology, University of Oxford
R. M. T. H. Adleman, Department of Biology and Environmental Science, Imperial College London
T. D. Price, Department of Ecology and Evolution, University of Oxford
D. J. Penny, Department of Biological Sciences, University of Edinburgh
P. D. F. Moorcroft, Department of Ecology and Evolutionary Biology, University of Toronto
A. R. B. Pedersen, Department of Biological Sciences, University of Oregon
A. M. C. Park, Department of Zoology, University of Cambridge
L. Chittka, School of Biological and Chemical Sciences, Queen Mary, University of London
H. R. Atkinson, School of Zoology and Geophysics, University of Oklahoma
E. S. Bye, Centre for Population Biology, University of Kent
S. Chapman, Department of Experimental Zoology, University of Cambridge
A. Coulson, School of Biology, Australian National University
D. P. Costa, Centre for Ocean Health University of St Andrews

AIMS AND SCOPE

Research papers. Proc. R. Soc. B welcomes articles of high quality in all aspects of biology. Currently, it is particularly strong in ecology in the widest sense, and behavioural and evolutionary biology, but it also includes significant numbers of papers in epidemiology, human biology, microscopy, palaeontology and biogeography. Authors are encouraged to submit articles not only in these fields, but also in all branches of biology. The criteria for selection are scientific excellence, originality and potential interest to a wide spectrum of biologists.

Review papers. The journal also publishes topical reviews in emerging areas of biological science that will be of interest to non-specialists. Typical topics are commissioned but not a priori agreed.

Convenient papers. Short additions to, or criticisms of, papers already published in this journal will also be considered. At the discretion of the editor, the author of the original paper may be invited to reply. Convenient papers should be short, interesting and conform to the rules of good manners.

SUBSCRIPTIONS

In 2011 Proc. R. Soc. B (ISSN 0962-8424) will be published twice a month. Full information on how to subscribe can be obtained by contacting our journal fulfilment agent, Portland Customer Services, Commerce Way, Collingswood, NJ 08108-1640; Tel: +1 609 769 1789; Fax: (609) 769 1831; email: sales@portlandservices.com or by visiting our website at www.portlandservices.com/procubs/subscriptiondetails. The Royal Society is a Registered Charity No. 207043.

Copyright © 2010 the Royal Society

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, this publication may only be reproduced, stored or transmitted, in any form or by any means, with the prior permission in writing of the publisher, or, in the case of reprographic reproduction, in accordance with the terms of licences issued by the Copyright Licensing Agency. In particular, the Society permits the making of a single photocopy of an article from this issue (under Sections 29 and 38 of this Act) for an individual for the purposes of research or study.

PROCEEDINGS OF THE ROYAL SOCIETY B

Editor-in-Chief
Professor Michael P. Hassell
Reviews Editor
Professor Michael T. Siva-Jothy
Publishing Editor
Victoria Millen

Editors
Professor Elizabeth Adkins-Regan
Professor Nigel Bennett
Professor Innes Cuthill
Professor Hans Hesnerbeek

GUIDANCE FOR AUTHORS

Selection criteria
The selection criteria are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Publishing format
Proc. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although papers are limited to ten journal pages in length (with a page-charge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (EMM). Contents of the EMM might include details of methods, denotations of equiations, large tables of data, DNA sequences and computer programs.

Electronic Submission details
The Royal Society’s electronic submission and peer-review process uses www.royalsociety.org/procubs to facilitate online submission. Authors are strongly encouraged to use a web-based submission system. Once your paper is submitted, it will be automatically sent to one of the journal’s editors who will handle your paper from that point on.

For further information on the Society’s activities, please contact the Publications Office, telephone +44 (0)20 7451 2629; proceedingsb@royalsociety.org
