GUIDANCE FOR AUTHORS

Selection criteria
The criteria for selection are scientific excellence, originality and interest across disciplines within biology. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many more good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Electronic Submission details
The Royal Society’s electronic-submission and peer-review service provides authors with the facility to submit their papers online, for the service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an immediate acknowledgement is sent that details how you can track your contribution online.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialing (+44) 020 7593 5661, or visit the Society’s Web site (royalsociety.org).
