GUIDANCE FOR AUTHORS

Selection criteria

The criteria for selection are work of outstanding importance, scientific excellence, originality and interest to a wide spectrum of biologists. The Editors are responsible for all editorial decisions and they make these decisions based on the reports received from the referees and/or Editorial Board members.

Many good manuscripts are submitted to us than we have space to print, and we give preference to those that present significant advances of broad interest. Submission of preliminary reports, of articles that merely confirm previous findings, and of articles that are likely to interest only small groups of specialists, is not encouraged. All articles are sent to Editorial Board members for an initial assessment of their suitability, and may be returned to authors without in-depth peer review if this assessment makes it seem unlikely that they will be accepted.

Publishing format

Proc. R. Soc. B articles are published regularly online and in print issues twice a month. Along with all Royal Society journals, we are committed to archiving and providing perpetual access. Although papers are limited to ten journal pages in length (with a page-charge for articles exceeding six pages), there is the facility for including Electronic Supplementary Material (ESM). Contents of the ESM might include details of methods, derivations of equations, large tables of data, DNA sequences and computer programs.

For further information on the Society’s activities, please contact the following departments on the extensions listed by dialing +44 (0)20 7451 2561, or visit the Society’s Web site (royalsociety.org).
