AIMS AND SCOPE

Research papers. Proc. R. Soc. B welcomes articles on high quality in all aspects of biology. This includes, but is particularly strong in ecology in the wider sense, and behavioural and evolutionary biology. Proc. R. Soc. B. has also published significant numbers of papers in epigenetics, human biology, neurobiological, palaeontology and bioinformatics. Authors are encouraged to submit articles not only in these fields, but also in the same discipline, where appropriate, and as long as there is a clear scientific and evolutionary connection.

Review papers. The journal also publishes topical reviews in emerging areas of biological science, where there will be still interest to non-specialists in the community but discussion will be examined and potentially rejected. Comments or criticisms of papers already published in this journal will also be considered. At the discretion of the editors, the authors of the original paper may be invited to reply. Comments should be short, and conform to the rules of good manners.

GUIDANCE FOR AUTHORS

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of scientific knowledge. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 Fellows and Foreign Members.

Our mission to expand knowledge and further the role of science and engineering is making the world a better place.

The Royal Society's strategic priorities are to:

- invest in future scientific leaders and in education;
- influence policymaking with the best scientific evidence;
- invigorate science and mathematics education;
- increase access to the best science internationally, and;
- inspire an interest in the joy, wonder and excitement of scientific discovery.

However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the author.

Conditions of publication

Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Proc. R. Soc. B employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic Submission details

The Royal Society's electronic-submission and peer-review service provides Proc. R. Soc. B authors with the facility to submit their papers online. The service allows you to upload files in a reliable and user-friendly way, using a Web-based system. When your paper is received, an unacknowledged receipt is sent that details how you can track your contribution online.

For full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rspb.royalsocietypublishing.org
