Review articles
The role of robustness in phenotypic adaptation and innovation 1249
A. Wagner

Research articles
A molecular palaeobiological hypothesis for the origin of aplacophoran molluscs and their derivation from chiton-like ancestors 1259
J. Vinther, E. A. Sperling, D. E. G. Briggs & K. J. Peterson

Multiple shifts between violet and ultraviolet vision in a family of passerine birds with associated changes in plumage coloration 1269
A. Ödeen, S. Pruett-Jones, A. C. Driskell, J. K. Armenta & O. Håstad

Population genomics of parallel phenotypic evolution in stickleback across stream–lake ecological transitions 1277

Simultaneous Mendelian and clonal genome transmission in a sexually reproducing, all-triploid vertebrate 1291
M. Stöck, J. Ustinova, C. Betto-Colliard, M. Schartl, C. Moritz & N. Perrin

Diversity–dependence tradeoffs between molecular phylogenies closer to agreement with the fossil record 1300
R. S. Ettienne, B. Haegeman, T. Stadler, T. Aze, P. N. Pearson, A. Purvis & A. B. Phillimore

Delayed recovery of non-marine tetrapods after the end-Permian mass extinction tracks global carbon cycle 1310
R. B. Irmis & J. H. Whiteside

Middle Eocene rodents from Peruvian Amazonia reveal the pattern and timing of caviomorph origins and biogeography 1319
