AIMS AND SCOPE
Research papers.
Proc. R. Soc. B welcomes articles of outstanding quality in all aspects of biological science. Currently, it is particularly strong in ecology in the widest sense, and in theoretical, evolutionary, and quantitative biology. All articles are subject to the normal peer review process and are assessed on the basis of originality, significance, and impact on the field. Authors are encouraged to submit articles not only in these fields, but in all branches of biology. The Editors are responsible for all editorial decisions and the paper may be invited to reply. Comment papers should be short, interesting and conform to the rules of good manners. Comment papers.

Electronic Submission details
The Royal Society's electronic-submission and peer-review service provides electronic access £1238, and for full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rspb.royalsocietypublishing.org.

PROCEEDINGS
OF THE ROYAL
SOCIETY
B

Editor-in-Chief
Professor Michael P. Hassell
Reviews Editor
Professor Mike T. Siva-Jothy
Publishing Editor
Victoria Millen

Editorial Board

Michael F. Hassell, Editor-in-Chief, Imperial College London
Simon A. Levin, Editor, Yale University
Gary R. Carvalho, Editor, Oxford University
Thomas B. Carter, Editor, University of Bristol
Hanna A. P. Heesterbeek, Editor, University of Utrecht
Hans J. S. Sauer, Joffre Joffre Smith, University of Sheffield
Terrence E. Robinson, University of Arizona
Fred W. Alles, University of Montana
Bastien Arús, Erasmus University
W. Scott Armstrong, University of Portsmouth
Michael D. Boode, University of Washington
Michael Begon, University of Liverpool
Niko Eerola, University of Oulu
Victor A. Brakhage, Penn State University
Lindeled Brummund, Australian National University
Rebecca Brereton, University of Neuchâtel
Marcos Cardillo, Australian National University
Laura Chitty, Queen Mary, University of London
Yin F. Cooper, University of Wyoming
Don F. Costa, University of California, Santa Cruz
Richard Conn, University of St Andrews
Luc De Meester, Katholieke Universiteit Leuven
Chris A. Downie, Imperial College London
Greg L. Dunbar, University Hospital Roosevelt
Santiago Díaz, CSIC
Jonathan Evans, University of Western Australia

Chris C. F一线城市, Queen Mary, University of London
Russell Foster, University of Oxford
Timmo Jokela, National Institute of Advanced Industrial Science and Technology
John Gardiner, Centre d'Écologie Fonctionnelle et Évolutive (CEFE)
Cuesta J. Gibson, Heriot-Watt University
Dickerson Gordon, Stanford University
Richard C. Gurven, University of California, Santa Barbara
Fangzheng He, University of Alberta
Stuart Hedges, University of Queens
Andrew Hector, University of Zurich
Joffre Joffre Smith, University of Sheffield
Jiro H. Huisman, The Royal Veterinary College
Vincent A. A. Jansen, Royal Holloway, University of London
Mathijs Kuijper, University of Basel
Mark Kulpit, The University of Texas at Austin
Romyery Knap, University of Oklahoma
Stephen F. Long, University of Illinois
Illy Lovett, Cornell University
Bobbie Low, University of Michigan
Per Lundberg, Lund University
Zhe-Nan Liu, University of Chicago
Norman MacNeil, Natural History Museum
Josh Mauleon, University of Salford
Lynn Martin, University of South Florida
BJ M. Méndez, University of Chicago
José Marques, Instituto Velloso de Mello
Mirjam Martens, Naturalis Biodiversity Centre
Craig McClure, National Evolutionary Synthesis Center
Amaro P. Morek, Indiana University
Pat Morgan, University of Glasgow
Daniel Nettle, Newcastle University
Ken Norris, University of Reading

Don Nussing, University of Edinburgh
Colin P. Osborne, University of Sheffield
Diane P. Piffard, University of Sussex
Karen S. F. Piper, University of North Carolina at Chapel Hill
Catherine A. Pitts, University of Chicago
Tom Foltz, Emory University
Daniel Provenza, University of Georgia
Jonathon Pusey, University of Oxford
Daniel L. Raboy, University of California Berkeley
Andy Raffel, University of Bristol
Jaekhun Rhim, Inje University
Susanne Römer, University of Münster
Mike C. Ritchie, University of St Andrews
Peter Rev�, University of Arizona
Locke Rowe, University of Cambridge
Dustin R. Rubenstein, California University
Howard Rudolph, University of Ottawa
Daniel Ruiz, Daedalus University
Jöel L. Sachs, University of California Riverside
Rebecca Salkin, University of California
Wolfram Schultze, University of Cambridge
Ludwig W. Stearns, University of Western Australia
Jennifer Smith, Smith School of Oceanography
Max Tallourd, University College London
Adrian R. L. Thomas, University of Oxford
Hiroko Tsuchiya, University of Tokyo
Jane C. Wilbur, Stanford University
Minaus van Schaiik, University Poste van Maria Curie
Julian L. van Leeuwen, University of Amsterdam
Mark Vedel, Université de Sherbrooke
Phillip C. Wittkopp, University of Virginia
Patricia A. Witten, University of Michigan
Do-Dong Yang, Zhejiang Normal University

The Royal Society, the national academy of science of the UK and the Commonwealth, is at the cutting edge of research in all aspects of biology. We support many top young scientists, engineers and technologists, influence science policy, debate scientific issues with the public and much more. We are an independent, charitable body and derive our authoritative status from over 1400 fellows and Foreign Members.

To expand knowledge and further the role of science and engineering in making the world a better place.

The Royal Society's strategic priorities are to:

• increase access to the best science internationally,
• invigorate science and mathematics education,
• influence policymaking with the best scientific evidence,
• and ensure the role of science is solicited and respected by governments, industry and institutions.

The Royal Society's strategic priorities are to:

• invest in future scientific leaders and in innovation,
• influence policymaking with the best scientific evidence,
• invigorate science and mathematics education,
• increase access to the best science internationally, and
• inspire an interest in the joy, wonder and excitement of scientific discovery.

However, the printed version must include enough detail to satisfy most non-specialist readers. Supplementary data up to 10Mb is placed on the Society’s website free of charge. Larger datasets must be deposited in recognised public domain databases by the authors.

Conditions of publication
Articles must not have been published previously, nor be under consideration for publication elsewhere. The main findings of the article should not have been reported in the mass media. Like many journals, Proc. R. Soc. B employs a strict embargo policy where the reporting of a scientific article by the media is embargoed until a specific time. The Editor-in-Chief has final authority in all matters relating to publication.

Electronic Submission details
The Royal Society’s electronic-submission and peer-review service provides electronic access £1238, and for full submission guidelines and access to all journal content please visit the Proc. R. Soc. B website, for further details see rspb.royalsocietypublishing.org.
